Botanica Marina: Form “Responsible authorship”

It is the policy of *Botanica Marina* that authors must conform to standards of responsible authorship, i.e., a) all of the authors must accept responsibility for the entire content of the submitted manuscript by signing the form below, and b) all of the authors must indicate their significant contributions to the work. Honorary authorship is strongly discouraged, i.e., authorship should not be awarded to people who made no intellectual contribution to the work, or who were not physically involved in conducting the research. Individuals who supported the research by providing laboratory space, equipment or financial support should be recognised in the Acknowledgements only.
Manuscripts submitted to *Botanica Marina* will not be sent out for review until the following form, signed by all the authors of the paper, is sent to the Editorial Office. Authors can either submit one copy of the form with all of the required signatures, or separate copies can be sent directly to the Editorial Office by the contributing authors. However, all authors named on the paper must sign the form.
