I. Qualitative and variable faces of phonological competence

Spoken languages

“Distinctive phones” in surface representation <i>D. Robert Ladd</i>	1
The functionality of incomplete neutralization in Dutch: The case of past-tense formation <i>Mirjam Ernestus and Harald Baayen</i>	27
Dynamics in grammar: Comment on Ladd and Ernestus & Baayen <i>Adamantios I. Gafos (commentary)</i>	51
The statistical basis of an unnatural alternation <i>Janet B. Pierrehumbert</i>	81
Modeling intonation in English: A probabilistic approach to phonological competence <i>Audra Dainora</i>	107
The diachrony of labiality in Trique, and the functional relevance of gradience and variation <i>Daniel Silverman</i>	133
Convergences and divergences of signed and spoken languages	
Effects of language modality on word segmentation: An experimental study of phonological factors in a sign language <i>Diane Brentari</i>	155

Phonology, phonetics, and the nondominant hand <i>Wendy Sandler</i>	185
Lexical retrieval in American Sign Language production <i>David P. Corina and Heather P. Knapp</i>	213
Phonological priming in British Sign Language <i>Matthew W.G. Dye and Shui-I Shih</i>	241
Signed Languages	
Phonetic implementation and phonetic pre-specification in sign language phonology <i>Harry van der Hulst and Els van der Kooij</i>	265
Variability in verbal agreement forms across four signed languages <i>Gaurav Mathur and Christian Rathmann</i>	287
Some current claims about sign language phonetics, phonology, and experimental results <i>David M. Perlmutter (commentary)</i>	315
II. Sources of variation and their role in the acquisition of phonological competence	
Getting the rhythm right: A cross-linguistic study of segmental duration in babbling and first words <i>Marilyn May Vihman, Satsuki Nakai, and Rory DePaolis</i>	341
Flexibility in the face of incompatible English VOT systems <i>James M. Scobbie</i>	367
On the scope of phonological learning: Issues arising from socially-structured variation <i>Gerard Docherty, Paul Foulkes, Jenny Tillotson, and Dominic Watt</i>	393

Variation in developing phonologies: Comments on Vihman and colleagues, Docherty and colleagues, and Scobbie <i>Shelley Velleman (commentary)</i>	423
--	-----

III. Knowledge of language-specific organization of speech gestures

Interaction of prosody and gestures

Prosody first or prosody last? Evidence from the phonetics of word-final /t/ in American English <i>Stefanie Shattuck-Hufnagel</i>	445
---	-----

Focusing, prosodic phrasing, and hiatus resolution in Greek <i>Mary Baltazani</i>	473
--	-----

Early vs. late focus: Pitch-peak alignment in two dialects of Serbian and Croatian <i>Rajka Smiljanić</i>	495
--	-----

Manifestation of prosodic structure in articulatory variation: Evidence from lip kinematics in English <i>Taehong Cho</i>	519
--	-----

Relating prosody and dynamic events: Comments on the papers by Cho and Smiljanić <i>Dani Byrd (commentary)</i>	549
---	-----

Local gesture interaction and perception

Syllable position effects and gestural organization: Articulatory evidence from Russian <i>Alexei Kochetov</i>	565
---	-----

Perceptual salience and palatalization in Russian <i>Darya Kavitskaya</i>	589
--	-----

Integrating coarticulation, assimilation, and blending into a model of articulatory constraints <i>Daniel Recasens</i>	611
Excrescent schwa and vowel laxing: Cross-linguistic responses to conflicting articulatory targets <i>Bryan Gick and Ian Wilson</i>	635
