

## Contents

4	<i>Preface</i>
6	<i>Yesterday – Today – Tomorrow</i> The Historical Use of Hardwood as a Building Material 7 Hardwood in Modern Timber Construction 11 Outlook and Relevance 15
18	<i>Forest Management Background</i>
20	<i>High-performance Materials with Potential for the Future</i> New Developments and Improvements in Structural Hardwood Products 20 Bonding of Hardwoods 21 Connections 21 Durability and Moisture 22 Joinery and Processing 22 Regulations for Use 23
24	<i>Wood Species</i>
30	<i>Hardwood Construction Products</i> Sawn Lumber and Finger-Jointed Solid Wood 30 Glued Laminated Timber and Hybrid Glulam 33 Beechwood Laminated Veneer Lumber 35 Engineered Timber Products of Hardwood 37 Information on Use 39 Durability 41 Emissions 43
44	<i>Building with Hardwood</i> Reasons for Using Hardwood 45 Hardwood Products in Use 47 Connections 52
54	<i>Example Builds</i> Ten Real-life Examples
104	<i>Appendix</i> Authors 105 Approvals, Standards 106 Bibliography, Links 107 Picture Credits 108 Acknowledgements 109 Subject Index 110
