**THE DWIGHT HARRINGTON TERRY FOUNDATION LECTURES
ON RELIGION IN THE LIGHT OF SCIENCE AND PHILOSOPHY**

The deed of gift declares that “the object of this foundation is not the promotion of scientific investigation and discovery, but rather the assimilation and interpretation of that which has been or shall be hereafter discovered, and its application to human welfare, especially by the building of the truths of science and philosophy into the structure of a broadened and purified religion. The founder believes that such a religion will greatly stimulate intelligent effort for the improvement of human conditions and the advancement of the race in strength and excellence of character. To this end it is desired that a series of lectures be given by men eminent in their respective departments, on ethics, the history of civilization and religion, biblical research, all sciences and branches of knowledge which have an important bearing on the subject, all the great laws of nature, especially of evolution . . . also such interpretations of literature and sociology as are in accord with the spirit of this foundation, to the end that the Christian spirit may be nurtured in the

fullest light of the world's knowledge and that
mankind may be helped to attain its highest
possible welfare and happiness upon this earth.”
The present work constitutes the latest volume
published on this foundation.
