<i>Preface</i>	ix
CHAPTER ONE	
Least Time	3
1.1 IMPORTANT FACTS	3
1.2 AN INTERPRETATION	5
1.3 FERMAT'S PRINCIPLE	8
1.4 IMAGE FORMATION	9
1.5 FINAL CAUSE	12
<i>Problems: 1.1 Hero's Problem, 1.2 More Than One Independent Variable, 1.3 Continuum Limit, 1.4 Least Resistance, 1.5 Spherical Mirror</i>	
CHAPTER TWO	
Calculus of Variations	17
2.1 AN INTRODUCTORY PROBLEM	17
2.2 EULER-LAGRANGE EQUATION	20
2.3 FIRST INTEGRALS	24
2.4 MORE THAN ONE UNKNOWN FUNCTION	25
<i>Problems: 2.1 Euler-Lagrange Equations, 2.2 Brachistochrone, 2.3 Minimum Surface, 2.4 First Integral, 2.5 Variational versus Direct Method</i>	
CHAPTER THREE	
Curved Light	33
3.1 PLANAR ATMOSPHERE	33
3.2 ROAD SURFACE MIRAGE	35
3.3 FIBER OPTIC	37
3.4 PARAMETRIC RAY EQUATIONS	38
<i>Problems: 3.1 Atmospheric Light Trajectory, 3.2 Designer Rays, 3.3 Falling Light, 3.4 Semicircular Rays, 3.5 Duffing's Equation, 3.6 Helix, 3.7 Exponential Spiral, 3.8 Luneberg Lens, 3.9 Time Evolution Equations, 3.10 Tautological First Integral</i>	

CONTENTS

CHAPTER FOUR	
Least Potential Energy	45
4.1 PRINCIPLE OF LEAST POTENTIAL ENERGY	45
4.2 ELEMENTARY EXAMPLES	49
4.3 CONSTRAINTS	50
4.4 LAGRANGE MULTIPLIERS	52
4.5 CATENARY	55
4.6 NATURAL BOUNDARY CONDITIONS	56
4.7 VERTICALLY HANGING ELASTIC COLUMN	58
<i>Problems: 4.1 Loaded Flywheel, 4.2 Inclined Plane,</i>	
<i>4.3 Cantilever Model, 4.4 Electrostatic Energy,</i>	
<i>4.5 Symmetric Catenary, 4.6 Dido's Problem, 4.7 Loaded</i>	
<i>Beam</i>	
CHAPTER FIVE	
Least Action	69
5.1 MAUPERTUIS	69
5.2 JACOBI'S PRINCIPLE OF LEAST ACTION	72
5.3 PROJECTILE TRAJECTORY	73
5.4 OPTICS AND MECHANICS	76
<i>Problems: 5.1 Minimum Action, 5.2 Continuum Limit,</i>	
<i>5.3 Geodesic, 5.4 Orbit Shapes, 5.5 Spherical Pendulum</i>	
CHAPTER SIX	
Hamilton's Principle—Restricted	81
6.1 HAMILTON'S PRINCIPLE	81
6.2 DERIVING THE RESTRICTED HAMILTON'S PRINCIPLE	84
6.3 SPHERICAL PENDULUM	87
6.4 LAGRANGE AND HAMILTON	89
<i>Problems: 6.1 Redux, 6.2 Equations of Motion, 6.3 An</i>	
<i>Optical Lagrangian?, 6.4 Other Coordinates,</i>	
<i>6.5 Generalized Kepler's Third Law, 6.6 2-D Harmonic</i>	
<i>Motion, 6.7 Elastic Pendulum, 6.8 Circle, 6.9 Ball within</i>	
<i>Circle</i>	
CHAPTER SEVEN	
Hamilton's Principle—Extended	95
7.1 HAMILTONIAN SYSTEMS	95
7.2 WATT'S GOVERNOR	97

CONTENTS

7.3 MULTIPARTICLE SYSTEMS	100
7.4 TWO-BODY CENTRAL POTENTIAL	103
7.5 GENERALIZED COORDINATES	106
7.6 SLIDING LADDER	108
7.7 SUMMARY AND PROSPECT	110
<i>Problems: 7.1 Classification, 7.2 Undriven Watt's Governor, 7.3 Rotating Tube, 7.4 Multiparticle Lagrangian, 7.5 Rotating Mass on a String, 7.6 Compound Pendulum, 7.7 3-D, 2-Mass Harmonic Oscillator, 7.8 Ellipsoid of Revolution</i>	
<i>Index</i>	115
