E.1. The Relationships of the Three Inequalities 59
3.1. Incentives in the Two Markets and Human Societies 72
4.1. Redistribution and Development 92
4.2. Household Decisions as Determined by Public Investment in Basic Education 103
5.1. Democracy’s Unique Advantage in Promoting Development 129
6.1. Marginal Effect of Polity2 Score on Stability at All Levels of GDP 153
8.1. The New Development Triangle 182
8.2. State Capacity as a Multidimensional, Multilayered, and Multicausal Concept 188
8.3. State Capacities versus Institutions and Policies 200

**Tables**

I.1. The “Lucky” Few: Countries with at Least 10 Years of ≥4% Growth in GDP 7
2.1. The Four Drivers of Individual Actions and the Six Dimensions of Institutions 40
2.2. Political Stability and Economic Growth Rate: Five African Countries 43
2.3. Political Stability Contributes to Development (80 Economies) 44
2.4. Positive Effect of Political Stability on Growth (113 Economies) 45
E.1. Three Kinds of Inequality and Their Determinants 56
3.1. Material Market versus Positional Market 65
4.1. Descriptions of Variables 109
4.2. Summary Descriptive Statistics of Dependent Variable and Key Independent Variables 110
4.3. Public Expenditure for Basic Education per Capita 112
4.4. Public Expenditure for Basic Education per Student 112
4.5. Total Public Expenditure for Basic Education 113
4.6. Ratio between the Growth Rate of Public Expenditure for Basic Education and the Growth Rate of Government Revenue 113
4.7. Ratio between the Growth Rate of Public Expenditure for Basic Education and the Growth Rate of GDP per Capita 114
4.8. A County’s Relative Positioning within a Province in Public Support for Primary Education 115
4.9. Public Support for Basic Education and ERPS: System GMM Estimations 116
6.1. Descriptive Statistics of Variables 145
6.2. Baseline Growth Models with Polity2 Score 148
6.3. Political Stability Contributes to Economic Growth 151
6.4. Conditional Effect of Polity2 Score on Political Stability at Different Levels of GDP per Capita 152
6.5. Growth Rate of GDPpc with Different Combinations of Polity2 Scores and GDPpc 154
7.1. Changing Demands on IFED in Different Stages of Economic Development 172
8.1. Conceptual Clarifications 184
8.2. Possible Patterns and Hypotheses for Empirical Testing 204
8.3. An Empirical Illustration of NDT: China versus India 206
5-A.1. Channels through Which Democracy May Impact Growth 226
6-A.1. List of the 79 Countries Comprising the Dataset 244
6-A.2. Explanatory and Control Variables: Included versus Excluded 245
