ABC Chinese Dictionary Series
Victor H. Mair, General Editor

The ABC Chinese Dictionary Series aims to provide a complete set of convenient and reliable reference tools for all those who need to deal with Chinese words and characters. A unique feature of the series is the adoption of a strict alphabetical order, the fastest and most user-friendly way to look up words in a Chinese dictionary. Most volumes contain graphically oriented indices to assist in finding characters whose pronunciation is not known. The ABC dictionaries and compilations rely on the best expertise available worldwide and are based on the application of new strategies for the study of Sinitic languages and the Chinese writing system, including the first clear distinction between the etymology of words, on the one hand, and the evolution of shapes, sounds, and meanings of characters, on the other. While aiming for conciseness and accuracy, series volumes also strive to apply the highest standards of lexicography in all respects, including compatibility with computer technology for information processing. Some of the dictionaries in this series are concerned with different varieties of modern Chinese, whereas others present the latest scholarly findings concerning earlier stages of development. All are aimed at facilitating the research and reading of scholars and students alike.
