# Contents

**Preface**

**Chapter 1**

Blame Parents

- Do the Good Die Young? 3
- The Family Myth 5

**Chapter 2**

The Optimistic Parent

- The Evolution of Family Size 9
  - The Puzzle of Obligate Brood Reduction 10
- How Many Babies? 11
  - Avian Families 16
- Core and Marginal Offspring 16
  - Asymmetric Sibling Rivalry Creates Disposable Offspring 18
- The Evolution of Family Structure 19
- What Is Parental Optimism? 21
- Why Parental Optimism? 23
  - Tracking Erratic Resources 23
  - Replacement 27
  - Facilitation 28
  - Multiple Incentives for Parental Optimism 29
  - Are Humans Optimistic Parents? 31

**Chapter 3**

Why Parents Play Favorites

- Mom Always Liked You Best 32
- The Fivefold Advantage of Favoritism 33
  - The Benefits and Costs of Unequal Parental Investment 34
  - Divestment of Unneeded Offspring 36
  - Benefits of Diversification 39
  - Correcting Earlier Decisions 41
  - Bet Hedging and Brood Reduction 41
Chapter 4
How Parents Play Favorites
What Is a Phenotypic Handicap? 43
How Birds Play Favorites 44
Primary Versus Secondary Handicaps 44
How Blackbirds Play Favorites 45
Reversible Handicaps 46
How Marsupials Play Favorites 47
Brood Reduction in Rabbits 49
How Plants Play Favorites 50
Different Species, Same Idea 51
Humans Play Favorites Too 52
Birth Order and Favoritism 53

Chapter 5
Family Conflict
Genetic Conflict between Parents and Offspring 55
Parent-Offspring Conflict 57
Pregnancy and Parent-Offspring Conflict 58
Natural-Born Cancers 60
Imprinted Genes in Humans 62
Genetic Conflict and Beckwith-Wiedemann Syndrome 64
Parent-Offspring Conflict over Embryo Growth 64
Imprinting and Gestational Diabetes 65
Pregnancy Sickness and Genetic Conflict 66
HCG: The Hormone of Pregnancy Sickness? 68
Evolution of Chorionic Gonadotropins in Primates 70
Chorionic Gonadotropins and Miscarriage 70

Chapter 6
Selfishness Unconstrained
Brood Parasitic Birds 79
Old World Cuckoos 79
. . . and New World Cowbirds 80
Cowbird Mafia? 80
Cuckoo Catfish 81
The Origins of Brood Parasitism 81
Adopting Runaways? 82
Forced Adoption of Nonkin 83
Voluntary Adoption of Nonkin 85
The Lesson of Brood Parasitism 86
Chapter 7
Screening for Offspring Quality  
The Logic of Progeny Choice 87
Sequential versus Simultaneous Progeny Choice 88
Progeny Choice in Humans 89
Adaptive Miscarriage 90
Chromosomal Defects in Humans 91
  Sex Chromosomes and Birth Defects 94
  Turner’s Syndrome and Genomic Imprinting 96
Birth Defects and Maternal Age 96
  Rejecting Low-Quality Embryos 97
  HCG and Adaptive Miscarriage 98
  Relaxed Screening in Older Mothers? 100
  Why Relaxed Selection? 103
  Why More Spontaneous Abortions in Older Mothers? 104
The Origin of Genetic Defects 105
  The Shadow of Menopause 105
Screening, Maternal Age, and the Role of Genomic Imprinting 106
Maternal Age and Twinning 108

Chapter 8
Why Twins? 109
  The Evolution of Brood and Family Size 109
    Fault-Tolerant Design in Humans 111
  Twinning as an Insurance Strategy 112
    Insurance Offspring in Birds 113
    In Vitro Fertilization and Twinning 114
  Age, Trisomy 21, and Twinning 117
  More Than Just Polyovulation 118
  Twinning and Individual Optimization 121
  Fit or Fat? 124
    A Womb for Two 126
  Natural Selection on Twinning Frequency 126
  Brood Reduction before Birth? 127

Chapter 9
Fatal Sibling Rivalry 129
  Siblicide 129
    Desperado Siblings Result from Extreme Favoritism 132
    The Good and the Best 133
    Facultative Versus Obligate Brood Reduction 135
Chapter 10
Family Harmony

Cooperation in Families

The Arthur Dent Effect

Why Cooperation?

The Road to Cooperation

Parental Optimism and the Evolution of Cooperation

Polyembryony and New Roles for Marginal Offspring

Parasitoid Wasps

Adaptive Suicide?

The Benefits of Teamwork

Social Insects: The Ultimate Team Players

Trophic Offspring

Sibling Synergies in Birds and Mammals

Conflict When Necessary, but Not Necessarily Conflict

Cooperative Defense . . . against Parents?

Facilitation in Humans?

Finding Their Niche: Birth Order and Human Behavior

Chapter 11
Cannibalism and Infanticide

The Pathways to Cannibalism

Honey, I Ate the Kids

Offspring Designed to be Eaten

The Pathways to Infanticide

Sexually Selected Infanticide

Killer Rodents

Infanticide in Families

The Unwilling Parent?

Chapter 12
Brave New Worlds

Artificial Parental Optimism and Infanticide

An Epidemic of Multiple Births

Risks of Multiple Gestation

The Ghost in the Machine

Embryo Reduction

Artificial Progeny Choice
