CONTENTS

PREFACE ........................................ v

CHAPTER 1. INTRODUCTION .......................... 1

1.1 General Remarks ................................ 1
1.2 Quantitative Statistical Observations ............ 2
1.3 Qualitative Statistical Observations ............. 6

CHAPTER 2. FREQUENCY DISTRIBUTIONS ............... 13

2.1 Frequency Distributions for Ungrouped Measurements ...... 13
2.2 Frequency Distributions for Grouped Measurements ....... 19
2.3 Cumulative Polygons Graphed on Probability Paper .......... 27
2.4 Frequency Distributions -- General .................. 29

CHAPTER 3. SAMPLE MEAN AND STANDARD DEVIATION ....... 34

3.1 Mean and Standard Deviation for the Case of Ungrouped Measurements ........................................... 34

3.11 Definition of the mean of a sample (ungrouped) ........ 34
3.12 Definition of the standard deviation of a sample (ungrouped) .................. 36

3.2 Remarks on the Interpretation of the Mean and Standard Deviation of a Sample .......................... 40

3.3 The Mean and Standard Deviation for the Case of Grouped Data ............................................. 42

3.31 An example ..................................... 42
3.32 The general case ................................ 44

3.4 Simplified Computation of Mean and Standard Deviation ... 48

3.41 Effect of adding a constant ...................... 48
3.42 Examples of using a working origin ................. 49
3.43 Fully coded calculation of means, variances and standard deviations .......................... 52

## CONTENTS

**CHAPTER 6. THE BINOMIAL DISTRIBUTION**

- 6.1 Derivation of the Binomial Distribution .......................... 122
- 6.2 The Mean and Standard Deviation of the Binomial Distribution .......................... 125
- 6.3 "Fitting" a Binomial Distribution to a Sample Frequency Distribution .......................... 128

**CHAPTER 7. THE POISSON DISTRIBUTION**

- 7.1 The Poisson Distribution as a Limiting Case of the Binomial Distribution .......................... 133
- 7.2 Derivation of the Poisson Distribution .......................... 133
- 7.3 The Mean and Variance of a Poisson Distribution .......................... 135
- 7.4 "Fitting" a Poisson Distribution to a Sample Frequency Distribution .......................... 137

**CHAPTER 8. THE NORMAL DISTRIBUTION**

- 8.1 General Properties of the Normal Distribution .......................... 144
- 8.2 Some Applications of the Normal Distribution .......................... 149
  - 8.21 "Fitting" a cumulative distribution of measurements in a sample by a cumulative normal distribution .......................... 149
  - 8.22 "Fitting" a cumulative binomial distribution by a cumulative normal distribution .......................... 152
- 8.3 The Cumulative Normal Distribution on Probability Graph Paper .......................... 159

**CHAPTER 9. ELEMENTS OF SAMPLING**

- 9.1 Introductory Remarks .......................... 165
- 9.2 Sampling from a Finite Population .......................... 165
  - 9.21 Experimental sampling from a finite population .......................... 165
  - 9.22 Theoretical sampling from a finite population .......................... 167
  - 9.23 The mean and standard deviation of means of all possible samples from a finite population .......................... 169
  - 9.24 Approximation of distribution of sample means by normal distribution .......................... 175
- 9.3 Sampling from an Indefinitely Large Population .......................... 179
  - 9.31 Mean and standard deviation of theoretical distributions of means and sums of samples from an indefinitely large population .......................... 179
  - 9.32 Approximate normality of distribution of sample mean in large samples from an indefinitely large population .......................... 184
CONTENTS

9.33 Remarks on the binomial distribution as a theoretical sampling distribution 

9.4 The Theoretical Sampling Distributions of Sums and Differences of Sample Means
  9.41 Differences of sample means
  9.42 Sums of sample means
  9.43 Derivations

CHAPTER 10. CONFIDENCE LIMITS OF POPULATION PARAMETERS

10.1 Introductory Remarks
10.2 Confidence Limits of $p$ in a Binomial Distribution
  10.21 Confidence interval chart for $p$
  10.22 Remarks on sampling from a finite binomial population
10.3 Confidence Limits of Population Means Determined from Large Samples
  10.31 Remarks about confidence limits of means of finite populations
10.4 Confidence Limits of Means Determined from Small Samples
10.5 Confidence Limits of Difference between Population Means Determined from Large Samples
  10.51 Confidence limits of the difference $p-p'$ in two binomial populations
  10.52 Confidence limits of the difference of two population means in case of small samples

CHAPTER 11. STATISTICAL SIGNIFICANCE TESTS

11.1 A Simple Significance Test
11.2 Significance Tests by Using Confidence Limits
11.3 Significance Tests without the Use of Population Parameters

CHAPTER 12. TESTING RANDOMNESS IN SAMPLES

12.1 The Idea of Random Sampling
12.2 Runs
12.3 Quality Control Charts

CHAPTER 13. ANALYSIS OF PAIRS OF MEASUREMENTS

13.1 Introductory Comments
13.2 The Method of Least Squares for Fitting Straight Lines
CONTENTS

13.21 An example ........................................ 240
13.22 The general case ................................. 245
13.23 The variance of estimates of $Y$ from $X$ ...... 250
13.24 Remarks on the sampling variability of
regression lines ....................................... 253
13.25 Remarks on the correlation coefficient ......... 255

13.3 Simplified Computation of Coefficients for
Regression Line ................................. 261

13.31 Computation by using a working origin .......... 262
13.32 Computation by using a fully coded scheme ..... 264

13.4 Generality of the Method of Least Squares .... 272

13.41 Fitting a line through the origin by least
squares ............................................. 273
13.42 Fitting parabolas and higher degree polynomials .. 273
13.43 Fitting exponential functions .................... 276

INDEX ............................................. 281
