1 Introduction	1
1.1 The Structure of the Argument	2
1.2 Rebooting ‘Code as Law’	4
(a) Code and/or Data?	7
(b) Regulation	9
(c) Legitimacy	10
(d) Code is both <i>More</i> , and <i>Less</i> , than Law	11
Design and Regulation	13
Computational Legalism	15
Digital Rights Management	17
1.3 Aspiring to Legitimacy in Code	19
(a) From Operation to Production	20
Fuller’s <i>Internal Morality of Law</i>	20
Wintgens’s <i>Legisprudence</i>	21
(b) Towards <i>Digisprudence</i> : Legitimate ‘Code as Law’	22
1.4 ‘Code as Law’, Code <i>versus</i> Law, or Something Else?	22
(a) Cyberlibertarianism	23
(b) Why Not ‘Compliance by Design’?	25
Other Notions of ‘by Design’	29
(c) Normative Relationships in Code and Law	30
The Programmer of the Programmer	32
1.5 In the Real World	32
(a) Blockchain Applications	32
Blockchain Design	33
‘Smart Contracts’?	35
(b) The Internet of Things	37
1.6 Conclusion	39

PART I COMPUTATIONAL LEGALISM AND THE RULE(S) OF CODE

2	A Design Perspective: Code is <i>More</i> than Law	43
2.1	Affordance	44
(a)	Real and Perceived Affordance	46
	Signifiers	48
2.2	Infusing Code with Normativity	49
(a)	Disaffordance	50
(b)	Postphenomenology and Code's Mediation of Reality	52
(c)	Code Mediating Perception	53
(d)	Code Mediating Action	54
	Affordance and Technological Mediation	59
(e)	A Spectrum of Technological Normativity	60
	Constitutive and Regulative Normativity	63
(f)	Technological Constitutionalism	65
2.3	Conclusion	67
3	A Legal Philosophy Perspective: Code is <i>Less</i> than Law	69
3.1	What is Legalism?	70
(a)	Solipsism and Positivism	73
(b)	Legalism According to Legisprudence	75
3.2	Computational Legalism	79
(a)	Ruleishness	80
	Mindless Execution	81
	Hard Edges	83
	Limited Ontology	83
	The Absence of Interpretation	86
(b)	Representationalism	87
	Does Code Contain Rules <i>per se</i> ?	87
	Constitutive and Regulative Rules	91
	Rules for Humans; Rules for Machines	95
(c)	Immediacy	96
	Default Configurations	97
	Pervasiveness	99
	Immutability	100
(d)	Opacity	102
	Code as a-legal 'Positivism'	104
(e)	The Veiling of Code's Production	105
3.3	Conclusion	107

PART II WHAT MAKES A GOOD RULE?

4	Criteria for Laws	111
4.1	Normative Criteria for Law-Making: The Aspirations of Legality	111
(a)	Input and Output Legitimacy in Law	115
(b)	Fuller's <i>Internal Morality of Law</i>	118
(c)	Wintgens's <i>Legisprudence</i>	121
	What is Legisprudence?	121
	The Requirement of Justification	122
	Freedom and the Trade-Off Model	123
	The Principle of Coherence (PC)	125
	The Principle of Alternativity (PA)	130
	The Principle of Temporality (PT)	131
	The Principle of Normative Density (PN)	132
4.2	Conclusion	132
5	Criteria for Code	135
5.1	Input and Output Legitimacy in Code	136
5.2	Output Legitimacy	140
(a)	Brownsword's 'Technological Management'	140
(b)	Leenes's 'Techno-regulation'	142
(c)	Koops's 'Criteria for Normative Technology'	143
5.3	Input Legitimacy	145
(a)	Hildebrandt's 'Legal Protection by Design'	145
(b)	Applying Fuller to Code	147
	Brownsword	147
	Asscher	151
5.4	Conclusion	153

PART III LEGITIMATING CODE: THEORY AND PRACTICE

6	The Digisprudential Affordances	159
6.1	Assessing Decisions, or Assessing Design?	160
6.2	Mapping the Criteria	161
(a)	Contestability as an Overarching Affordance	163
	Affording Evidential Scrutiny to Courts	163
6.3	From Characteristics to Affordances	166
(a)	Ruleishness	166
	Digisprudential Affordance: Choice	167
	Blockchain Applications	176

	The Internet of Things	178
(b)	Opacity	178
	Digisprudential Affordance: Transparency of Provenance	179
	Digisprudential Affordance: Transparency of Purpose	180
	Digisprudential Affordance: Transparency of Operation	182
	Blockchain Applications	184
	The Internet of Things	185
(c)	Immediacy	187
	Digisprudential Affordance: Delay	188
	Blockchain Applications	195
	The Internet of Things	196
(d)	Immutability	197
	Digisprudential Affordance: Oversight	198
	Blockchain Applications	200
	The Internet of Things	203
(e)	Pervasiveness	204
6.4	Conclusion	205
7	Operationalising Digisprudence	207
7.1	The Programmer of the Programmer	208
(a)	From Primary and Secondary Rules to Primary and Secondary (Dis)affordances	209
7.2	Agile Development	211
7.3	Integrated Development Environments	213
(a)	Code Verification versus Legal Proof: Justice being Seen to be Done	215
7.4	Code and Natural Language	216
(a)	The Interpretative Affordances of Programming Languages	217
(b)	The Linguistic Relativity of Programming Languages	219
(c)	Describing Code Isomorphically	221
	Behaviour-Driven Development	222
	Interpreting Code as a Visual Model	224
7.5	Conclusion	229
8	Rebooting Code as Law: Conclusions and Next Steps	231
8.1	The Contemporary Relevance of Digisprudence	232
8.2	Next Steps?	234
(a)	The Future of Compliance by Design	234

(b) Design and Private Law	236
(c) 'Legitimacy Impact Assessment'	237
8.3 Concluding Thoughts	239
Bibliography	241
Index	260
