

Acknowledgements

It is another milestone for me in my academic career to publish this book. It is a pleasure to thank those who made this possible.

I am indebted to the series editors Will Baker and Jennifer Jenkins for their guidance and support on the book's journey from proposal to final manuscript. Without their encouragement and patience, the publication of this monograph would not have been possible. I am also grateful to the anonymous reviewers for their valuable comments and suggestions that have led to significant improvement on the presentation and quality of the manuscript.

I would like to show my deepest gratitude to Professor Emeritus Carol Rinnert for her immense inspiration and support from the very beginning of my academic career. As a former supervisor and a friend, she has helped me in many aspects of life. I am truly thankful for her insightful and perspective comments on the earlier draft of this work too.

My whole-hearted thanks go to my husband, Yusuke Hamada and my parents, Katsuyoshi and Takako. They have always endowed me with emotional support and constant warm encouragement, which strengthened me and helped accomplish this expedition.

This monograph is based on my doctoral thesis *Japanese L2 English users' second language identities and pragmatic use in relations of power and culture* (University of Essex 2011) although much revised and reorganised. The list below shows the author's published papers based on the thesis, which share some parts of the book.

- Nogami, Yoko. 2013. Negotiation of second language identities in shifting power relations: Voices of Japanese L2 English users. *Hiroshima Journal of International Studies* 19. 81–100.
- Nogami, Yoko. 2018. Identity and pragmatic language use among East Asian ELF speakers and its implications for English-medium Education. In Kumiko Murata (ed.), *ELF in EMI settings in higher education*, 176–197. London: Routledge.
- Nogami, Yoko. Forthcoming. Understanding the ELF phenomenon through narrative inquiry: A diary study on identities of Japanese ELF users. In Kumiko Murata (ed.), *ELF research methods and approaches to data and analyses: Theoretical and methodological underpinnings*. London: Routledge.

All the works that have led to the completion of the manuscript could not have been achieved without cooperation of the research participants. I am extremely grateful to all of them for their participation and for sharing their stories with me. This is the product of collaboration among people who worked with me.
