Acknowledgments

This book was initiated and organized through the Consortium for Agricultural, Resource, and Environmental Policy Research. Formed in 1988, the consortium fosters advances in socioeconomic research on policies affecting natural resources, the environment, and agriculture. Its members include researchers, research managers, policymakers, and policy analysts from universities, government, and private research organizations.

The book would not have been possible without the financial support of the Office of Policy Planning and Evaluation, U.S. Environmental Protection Agency, the Soil Conservation Service and Economic Research Service, U.S. Department of Agriculture, and the Center for International Food and Agricultural Policy of the University of Minnesota. A grant from the Farm Foundation was extremely useful in the initial planning for the book. Our involvement with the consortium and our editorial efforts were made possible in part by the Departments of Agricultural Economics and the agricultural experiment stations at the University of Illinois and at Purdue University.

The manuscript was expertly prepared by Sandy Waterstradt, with excellent copyreading assistance from Pedro Hernandez. Pam Ferdinand and Gia Hamilton of Lynne Rienner Publishers provided encouragement and efficient guidance through the publication process.
