Tables and Figures

Tables

1.1 DDIR Interstate Conflict Dataset Projects 8

3.1 Aggregate Rates of Interstate Conflict Events, 1495–1988 A.D. 48

Figures

2.1 Codesheet Model for Describing a Dataset According to the ICDC Standard 14

3.1 University Location and Network of NSF-DDIR Projects on Interstate Conflict Datasets 41

3.2 Historical Range of the DDIR Interstate Conflict Datasets, 1495–1988 A.D. 44

3.3 Average and Range of Onset Rate Estimates for Severe and Potentially Severe International Conflict Events 46

3.4 Frequency-Range Diagram: Dataset Clusters Formed by Different Event Rate Frequencies and Calendar Ranges 49

3.5 Logic Success Tree Model for the Occurrence of a Generic Conflict Event in a Given Dataset 55

3.6 Logic Success Tree for the Occurrence of a Militarized Interstate Dispute Event in COW 10 56

3.7 Logic Success Tree for the Occurrence of an International Crisis Event in Wilkenfeld 5A 57

3.8 Logic Success Tree for the Occurrence of a Foreign Policy Crisis Event in Wilkenfeld 5B 58

3.9 Logic Success Tree for the Occurrence of an International Military Intervention Event in Pearson 8 59

3.10 Logic Success Tree for the Occurrence of an Interstate War Involving Great Powers Event in Levy 4A 60

3.11 Logic Success Tree for the Occurrence of a Great Power War Event in Levy 4B 61

3.12 Logic Success Tree for the Occurrence of a Major-Minor Power War Event in Midlarsky 9 62

3.13 Logic Success Tree for the Occurrence of an International War Event in COW 7 63
