

# Contents

<b>1</b>	<b>Knots and isotopies</b>	1
1.A	Knots	1
1.B	Equivalence of knots	4
1.C	Knot projections	9
1.D	Global geometric properties	12
1.E	History and sources	14
1.F	Exercises	14
<b>2</b>	<b>Geometric concepts</b>	16
2.A	Geometric properties of projections	16
2.B	Seifert surfaces and genus	19
2.C	Companion knots and product knots	21
2.D	Braids, bridges, plats	23
2.E	Slice knots and algebraic knots	26
2.F	History and sources	28
2.G	Exercises	28
<b>3</b>	<b>Knot groups</b>	30
3.A	Homology	30
3.B	Wirtinger presentation	32
3.C	Peripheral system	40
3.D	Knots on handlebodies	44
3.E	Torus knots	48
3.F	Asphericity of the knot complement	50
3.G	History and sources	51
3.H	Exercises	52

<b>4</b>	<b>Commutator subgroup of a knot group</b>	54
4.A	Construction of cyclic coverings	54
4.B	Structure of the commutator subgroup	57
4.C	A lemma of Brown and Crowell	59
4.D	Examples and applications	62
4.E	Commutator subgroups of satellites	64
4.F	History and sources	68
4.G	Exercises	68
<b>5</b>	<b>Fibered knots</b>	71
5.A	Fibration theorem	71
5.B	Fibered knots	74
5.C	Applications and examples	77
5.D	History and sources	84
5.E	Exercises	84
<b>6</b>	<b>A characterization of torus knots</b>	85
6.A	Results and sources	85
6.B	An elementary proof of Theorem 6.1	88
6.C	Remarks on the proof	93
6.D	History and sources	96
6.E	Exercises	96
<b>7</b>	<b>Factorization of knots</b>	97
7.A	Composition of knots	97
7.B	Uniqueness of the decomposition into prime knots: proof	102
7.C	Fibered knots and decompositions	106
7.D	History and sources	108
7.E	Exercises	109
<b>8</b>	<b>Cyclic coverings and Alexander invariants</b>	111
8.A	Alexander module	111
8.B	Infinite cyclic coverings and Alexander modules	112
8.C	Homological properties of $C_\infty$	119
8.D	Alexander polynomials	122
8.E	Finite cyclic coverings	132
8.F	History and sources	137
8.G	Exercises	137

<b>9</b>	<b>Free differential calculus and Alexander matrices</b>	140
9.A	Regular coverings and homotopy chains	140
9.B	Fox differential calculus	142
9.C	Calculation of Alexander polynomials	144
9.D	Alexander polynomials of links	149
9.E	Alexander–Conway polynomial	152
9.F	Finite cyclic coverings again	155
9.G	History and sources	158
9.H	Exercises	158
<b>10</b>	<b>Braids</b>	161
10.A	The classification of braids	161
10.B	Normal form and group structure	169
10.C	Configuration spaces and braid groups	174
10.D	Braids and links	179
10.E	History and sources	188
10.F	Exercises	189
<b>11</b>	<b>Manifolds as branched coverings</b>	191
11.A	Alexander’s theorem	191
11.B	Branched coverings and Heegaard diagrams	197
11.C	History and sources	206
11.D	Exercises	207
<b>12</b>	<b>Montesinos links</b>	208
12.A	Schubert’s normal form of knots and links with two bridges	208
12.B	4-Plats (Viergeflechte)	213
12.C	Alexander polynomial and genus of a knot with two bridges	218
12.D	Classification of Montesinos links	222
12.E	Symmetries of Montesinos links	230
12.F	History and sources	236
12.G	Exercises	236
<b>13</b>	<b>Quadratic forms of a knot</b>	238
13.A	The quadratic form of a knot	238
13.B	Computation of the quadratic form of a knot	247
13.C	Alternating knots and links	253
13.D	Comparison of different concepts and examples	258

13.E	History and sources	264
13.F	Exercises	264
<b>14</b>	<b>Representations of knot groups</b>	<b>266</b>
14.A	Metabelian representations	266
14.B	Homomorphisms of $\mathcal{G}$ into the group of motions of the Euclidean plane	272
14.C	Linkage in coverings	279
14.D	Periodic knots	285
14.E	History and sources	297
14.F	Exercises	297
<b>15</b>	<b>Knots, knot manifolds, and knot groups</b>	<b>301</b>
15.A	Examples	301
15.B	Property P for special knots	304
15.C	Prime knots and their manifolds and groups	315
15.D	Groups of product knots	329
15.E	History and sources	332
15.F	Exercises	333
<b>16</b>	<b>Bridge number and companionship</b>	<b>334</b>
16.A	Seifert surfaces for satellites	334
16.B	Companions of order one.	337
16.C	Bridge number and height functions	339
16.D	History and sources	352
16.E	Exercises	352
<b>17</b>	<b>The 2-variable skein polynomial</b>	<b>353</b>
17.A	Construction of a trace function on a Hecke algebra	353
17.B	The HOMFLY-PT polynomial	359
17.C	History and sources	364
17.D	Exercises	364
<b>A</b>	<b>Algebraic theorems</b>	<b>365</b>
<b>B</b>	<b>Theorems of 3-dimensional topology</b>	<b>371</b>
<b>C</b>	<b>Table</b>	<b>375</b>
C.1	Table	376
<b>D</b>	<b>Knot projections <math>0_1-9_{49}</math></b>	<b>384</b>
