Foreword —— V

Gabriel Altmann
Introduction —— 1

Sergey N. Andreev and Vadim V. Borisov
Linguistic Analysis Based on Fuzzy Similarity Models —— 7

François Bavaud, Christelle Cocco, Aris Xanthos
Textual navigation and autocorrelation —— 35

Martina Benešová and Radek Čech
Menzerath-Altmann law versus random model —— 57

Radek Čech
Text length and the lambda frequency structure of a text —— 71

Reinhard Köhler
Linguistic Motifs —— 89

Reinhard Köhler and Arjuna Tuzzi
Linguistic Modelling of Sequential Phenomena: The role of laws —— 109

Ján Mačutek and George K. Mikros
Menzerath-Altmann Law for Word Length Motifs —— 125

Jiří Milička
Is the Distribution of L-Motifs Inherited from the Word Length Distribution? —— 133

Adam Pawłowski and Maciej Eder
Sequential Structures in “Dalimil’s Chronicle”: Quantitative analysis of style variation —— 147
Taraka Rama and Lars Borin
Comparative Evaluation of String Similarity Measures for Automatic Language Classification —— 171

Vassiliki Rentoumi, Anastasia Krithara, Nikos Tzanos
Predicting Sales Trends
Can sentiment analysis on social media help? —— 201

Andrij Rovenchak
Where Alice Meets Little Prince:
Another approach to study language relationships —— 217

Peter Zörnig
A Probabilistic Model for the Arc Length in Quantitative Linguistics —— 231

Subject Index —— 247

Authors’ Index —— 253

Authors’ Addresses —— 257
