

## Acknowledgments

We would like to express our gratitude to the memory of the late Professor Rüdiger Göbel of the University of Duisburg–Essen. He greatly impacted the direction of Peter Loth's research and initiated a research project that led to our subsequent collaboration. Carol Jacoby would like to thank him for his generous help and encouragement in incorporating and extending her previous research. She gratefully acknowledges Professor Emeritus Paul Eklof of the University of California, Irvine, for recognizing the synergy possible between this research and her previous work, and providing suggestions and connections to make it happen.

This project was partially supported by a University Research/Creativity Grant (URCG) from Sacred Heart University. We wish to thank Walter de Gruyter Verlag for the publication of this book.
