HISTORICAL DEVELOPMENT AND PERSPECTIVES OF THE SERIES	v
PREFACE TO VOLUME 5	vii
CONTRIBUTORS TO VOLUME 5	xvii
TITLES OF VOLUMES 1–44 IN THE <i>METAL IONS IN BIOLOGICAL SYSTEMS</i> SERIES	xxi
CONTENTS OF VOLUMES IN THE <i>METAL IONS IN LIFE SCIENCES</i> SERIES	xxiii
<b>1 METALLOTHIONEINS: HISTORICAL DEVELOPMENT AND OVERVIEW</b>	<b>1</b>
<i>Monica Nordberg and Gunnar F. Nordberg</i>	
Abstract	2
1. Introduction	2
2. History of Metallothioneins	3
3. Protein Chemistry and Metal Binding	7
4. Methods for Quantification of Metallothionein	8
5. Role of Metallothionein in Metal Metabolism and Toxicology	11
6. Metallothionein and DNA, Genetic Polymorphism, Gender Perspectives	16
7. Metallothioneins and Disease	18

8. Future Aspects on Metallothioneins	22
9. Conclusions	23
Abbreviations	24
References	25
<b>2 REGULATION OF METALLOTHIONEIN GENE EXPRESSION</b>	<b>31</b>
<i>Kuppusamy Balamurugan and Walter Schaffner</i>	
Abstract	32
1. Introduction	32
2. Metallothioneins are Encoded by a Family of Short Genes	33
3. Regulation of Metallothionein Expression is mostly Transcriptional	35
4. Metal Response Elements in the Upstream Promoter–Enhancer Region Confer Metal Inducibility	36
5. Metal Response Element Binding Transcription Factor (MTF-1)	37
6. Transcription Factors in other Species Implicated in Heavy Metal Handling	43
7. Concluding Remarks and Open Questions	44
Acknowledgments	45
Abbreviations	45
References	45
<b>3 BACTERIAL METALLOTHIONEINS</b>	<b>51</b>
<i>Claudia A. Blindauer</i>	
Abstract	52
1. Introduction	52
2. Structure: A Hybrid Metallothionein/Zinc Finger	57
3. Thermodynamic and Dynamic Properties	61
4. The BmtA Family	71
5. Biotechnological Uses of Metallothioneins in Bacteria	75
6. Concluding Remarks	76
Acknowledgments	77
Abbreviations and Definitions	77
References	78

CONTENTS	xi
<b>4 METALLOTHIONEINS IN YEAST AND FUNGI</b>	<b>83</b>
<i>Benedikt Dolderer, Hans-Jürgen Hartmann, and Ulrich Weser</i>	
Abstract	84
1. Introduction	84
2. Family 8 Metallothioneins	86
3. Cu-Metallothionein in <i>Saccharomyces cerevisiae</i>	89
4. Metallothionein-like Protein Crs5 in <i>Saccharomyces cerevisiae</i>	97
5. Metallothionein-1 and Metallothionein-2 in <i>Candida glabrata</i>	98
6. Zinc and Cadmium Buffering Systems	100
7. Concluding Remarks	100
Acknowledgments	102
Abbreviations	102
References	102
<b>5 METALLOTHIONEINS IN PLANTS</b>	<b>107</b>
<i>Eva Freisinger</i>	
Abstract	108
1. Introduction	108
2. Classification	110
3. Function	117
4. Isolation and Purification	125
5. Spectroscopic Characterization	129
6. Incorporation of Sulfide Ions	138
7. Structure	139
8. Concluding Remarks and Future Directions	147
Acknowledgments	148
Abbreviations	148
References	149
<b>6 METALLOTHIONEINS IN DIPTERA</b>	<b>155</b>
<i>Silvia Atrian</i>	
Abstract	156
1. Introduction	156
2. Metallothionein Genes in <i>Drosophila melanogaster</i> : Genomic and Chromosomal Architecture. Gene Amplification	157
3. Metallothionein Transcripts: Tissue and Developmental Differential Expression	161

4.	The Metallothionein Proteins in <i>Drosophila melanogaster</i>	166
5.	Metallothioneins in Fly Physiology: Metal Homeostasis	171
6.	Metallothionein Molecular Differentiation in the <i>Drosophila</i> Genus	175
7.	Metallothioneins in Other (Non- <i>Drosophilidae</i> ) <i>Diptera</i> and Insecta	177
8.	Concluding Overview	178
	Abbreviations and Definitions	179
	References	179
<b>7</b>	<b>EARTHWORM AND NEMATODE METALLOTHIONEINS</b>	<b>183</b>
	<i>Stephen R. Stürzenbaum</i>	
	Abstract	183
1.	Introduction	184
2.	From Genes to Proteins	186
3.	Transcriptional Regulation	190
4.	Cellular and Subcellular Localization	191
5.	Transgenic Worms	193
6.	Concluding Remarks and Future Directions	195
	Acknowledgments	195
	Abbreviations	195
	References	196
<b>8</b>	<b>METALLOTHIONEINS IN AQUATIC ORGANISMS: FISH, CRUSTACEANS, MOLLUSCS, AND ECHINODERMS</b>	<b>199</b>
	<i>Laura Vergani</i>	
	Abstract	200
1.	Introduction	200
2.	Non-Mammalian Metallothioneins	201
3.	Aspects of Metallothionein Function in Aquatic Organisms	202
4.	Metallothioneins from Fish	204
5.	Metallothioneins from Marine Crustaceans	214
6.	Metallothioneins from Marine Molluscs	219
7.	Metallothioneins from Echinoderms	228
8.	Concluding Remarks	232
	Acknowledgments	233
	Abbreviations and Definitions	233
	References	233

<b>9</b>	<b>METAL DETOXIFICATION IN FRESHWATER ANIMALS. ROLES OF METALLOTHIONEINS</b>	<b>239</b>
	<i>Peter G. C. Campbell and Landis Hare</i>	
	Abstract	240
	1. Introduction	241
	2. Basic Concepts	243
	3. Review of Field Observations Linking Changes in Metal Exposure to Changes in Subcellular Distribution and the Onset of Deleterious Effects	253
	4. Concluding Remarks and Future Directions	272
	Acknowledgements	273
	Abbreviations and Definitions	274
	References	274
<b>10</b>	<b>STRUCTURE AND FUNCTION OF VERTEBRATE METALLOTHIONEINS</b>	<b>279</b>
	<i>Juan Hidalgo, Roger Chung, Milena Penkowa, and Milan Vašák</i>	
	Abstract	280
	1. Introduction	280
	2. Mammalian Metallothionein Gene and Protein Structure	281
	3. Non-Mammalian Vertebrate Metallothioneins	291
	4. Metallothionein-1 and -2 Functional Aspects	293
	5. Metallothioneins in the Central Nervous System	299
	6. Concluding Remarks and Future Directions	304
	Acknowledgments	305
	Abbreviations	305
	References	306
<b>11</b>	<b>METALLOTHIONEIN-3, ZINC, AND COPPER IN THE CENTRAL NERVOUS SYSTEM</b>	<b>319</b>
	<i>Milan Vašák and Gabriele Meloni</i>	
	Abstract	320
	1. Introduction	320
	2. Mammalian Metallothioneins in the Brain	321
	3. Zinc and Copper in the Brain	325
	4. Metallothionein-3 Structure and Reactivity	332

5. Roles of Metallothionein-3 in Zinc and Copper Physiology and Pathology	339
6. Concluding Remarks	343
Acknowledgments	343
Abbreviations	343
References	345
<b>12 METALLOTHIONEIN TOXICOLOGY: METAL ION TRAFFICKING AND CELLULAR PROTECTION</b>	<b>353</b>
<i>David H. Petering, Susan Krezoski, and Niloofar M. Tabatabai</i>	
Abstract	355
1. Introduction	355
2. Animal Metallothioneins	356
3. Metallothionein and Toxicology. An Overview	358
4. Metallothionein's Role in Toxicology: Results with the MT-1- and MT-2-Null Mice and Derived Cells	361
5. Metal Ion Toxicology in Relation to Metallothionein Chemistry	363
6. Oxidant Toxicology in Relation to Metallothionein Chemistry	377
7. Electrophile Toxicology and Metallothionein Chemistry	386
8. General Conclusions	388
Acknowledgments	388
Abbreviations	389
References	389
<b>13 METALLOTHIONEIN IN INORGANIC CARCINOGENESIS</b>	<b>399</b>
<i>Michael P. Waalkes and Jie Liu</i>	
Abstract	400
1. Introduction	400
2. Metallothionein in Metal Carcinogenesis	401
3. Mechanisms by which Metallothionein may Reduce Metal Carcinogenesis	406
4. Concluding Remarks and Future Directions	408
Acknowledgments	409
Abbreviations	409
References	409

<b>14</b>	<b>THIOREDOXINS AND GLUTAREDOXINS. FUNCTIONS AND METAL ION INTERACTIONS</b>	<b>413</b>
	<i>Christopher Horst Lillig and Carsten Berndt</i>	
	Abstract	414
	1. Introduction	414
	2. Functions of Thioredoxins and Glutaredoxins	418
	3. Metal Binding Members of the Thioredoxin Family of Proteins	421
	4. Metal Ion Interactions and Physiology	425
	5. Concluding Remarks and Future Directions	430
	Acknowledgments	430
	Abbreviations	430
	References	431
<b>15</b>	<b>METAL ION-BINDING PROPERTIES OF PHYTOCHELATINS AND RELATED LIGANDS</b>	<b>441</b>
	<i>Aur�lie Devez, Eric Achterberg, and Martha Gledhill</i>	
	Abstract	442
	1. Introduction	442
	2. Phytochelatins and Related Ligands	450
	3. Importance of Phytochelatins and Related Ligands in Metal Tolerance	457
	4. Phytochelatin Induction in Phytoplankton in Response to Metal Stress	460
	5. Concluding Remarks and Future Directions	469
	Acknowledgments	470
	Abbreviations	471
	References	472
	<b>SUBJECT INDEX</b>	<b>483</b>
