HISTORICAL DEVELOPMENT AND PERSPECTIVES OF THE SERIES	v
PREFACE TO VOLUME 9	vii
CONTRIBUTORS TO VOLUME 9	xvii
TITLES OF VOLUMES 1–44 IN THE <i>METAL IONS IN BIOLOGICAL SYSTEMS</i> SERIES	xxi
CONTENTS OF VOLUMES IN THE <i>METAL IONS IN LIFE SCIENCES</i> SERIES	xxiii
<b>1 METAL ION BINDING TO RNA</b>	<b>1</b>
<i>Pascal Auffinger, Neena Grover, and Eric Westhof</i>	
Abstract	2
1. Introduction	3
2. Details of Ion Coordination	3
3. Physiological Relevance of Metal Ions	5
4. Monovalent Cations	6
5. Divalent Cations	10
6. Trivalent Cations	20
7. Other Trivalent and Tetravalent Cations	24
8. Anions	25
9. Subjectivity in the Structure Determination Process	26
10. Summary	26
Acknowledgments	28

Abbreviations and Definitions	28
References	29
<b>2 METHODS TO DETECT AND CHARACTERIZE METAL ION BINDING SITES IN RNA</b>	<b>37</b>
<i>Michèle C. Erat and Roland K. O. Sigel</i>	
Abstract	39
1. Introduction	39
2. General Considerations	40
3. Spectroscopic Methods	46
4. Chemical and Biochemical Methods	67
5. Computational Methods	80
6. Calculation of Binding Constants	85
7. Concluding Remarks and Future Directions	89
Acknowledgments	90
Abbreviations	90
References	91
<b>3 IMPORTANCE OF DIFFUSE METAL ION BINDING TO RNA</b>	<b>101</b>
<i>Zhi-Jie Tan and Shi-Jie Chen</i>	
Abstract	102
1. Introduction	102
2. Diffuse Ions Provide a Significant Stabilizing Force for RNA Structure	103
3. Diffuse Ion is Critical to RNA Folding Kinetics	110
4. Theoretical Predictions for the Diffuse Ion Binding to RNAs	113
5. Correlated Distribution of Multivalent Diffuse Ions: Theory Versus Experiment	115
6. General Conclusions	119
Acknowledgments	120
Abbreviations	120
References	121
<b>4 RNA QUADRUPLEXES</b>	<b>125</b>
<i>Kangkan Halder and Jörg S. Hartig</i>	
Abstract	125
1. Introduction To RNA Quadruplexes	126
2. Thermodynamic Stability	127
3. Conformational Variations	130

4. Biological Function	130
5. Conclusions	135
Acknowledgment	136
Abbreviations	136
References	137
<b>5 THE ROLES OF METAL IONS IN REGULATION BY RIBOSWITCHES</b>	<b>141</b>
<i>Adrian R. Ferré-D'Amaré and Wade C. Winkler</i>	
Abstract	142
1. Introduction	142
2. Metal Ions that Assist Recognition of Riboswitch Ligands	145
3. Metal Ions and Riboswitch Folding	151
4. Magnesium-Sensing Riboswitches: <i>Salmonella mgtA</i>	154
5. Magnesium-Sensing Riboswitches: The M-Box RNA	161
6. Are There Additional Classes of Metal-Sensing Riboswitches?	168
Acknowledgments	169
Abbreviations	169
References	170
<b>6 METAL IONS: SUPPORTING ACTORS IN THE PLAYBOOK OF SMALL RIBOZYMES</b>	<b>175</b>
<i>Alexander E. Johnson-Buck, Sarah E. McDowell, and Nils G. Walter</i>	
Abstract	176
1. Introduction	176
2. Interactions Between Metal Ions and Small Ribozymes	178
3. Roles of Metal Ions in Small Ribozymes	183
4. Concluding Remarks and Future Directions	189
Acknowledgment	190
Abbreviations and Definitions	190
References	191
<b>7 MULTIPLE ROLES OF METAL IONS IN LARGE RIBOZYMES</b>	<b>197</b>
<i>Daniela Donghi and Joachim Schnabl</i>	
Abstract	198
1. Introduction	198
2. Metal Ions in Folding and Catalysis: A Brief Overview	200
3. Group I Intron Ribozymes	205

4. Group II Intron Ribozymes	212
5. RNase P	221
6. Concluding Remarks	226
Acknowledgments	227
Abbreviations	227
References	228
<b>8 THE SPLICEOSOME AND ITS METAL IONS</b>	<b>235</b>
<i>Samuel E. Butcher</i>	
Abstract	235
1. Introduction	236
2. The Pre-mRNA Splicing Mechanism	238
3. Is the Spliceosome a Ribozyme?	241
4. Structural Biology of the Spliceosome	243
5. Concluding Remarks and Future Directions	247
Acknowledgments	248
Abbreviations	248
References	249
<b>9 THE RIBOSOME: A MOLECULAR MACHINE POWERED BY RNA</b>	<b>253</b>
<i>Krista Trapp and Norbert Polacek</i>	
Abstract	254
1. The Ribosome – The Largest Natural Ribozyme	254
2. Ribosomal Biogenesis	258
3. The Molecular Anatomy of Functional Centers	262
4. Metal Ions and the Evolution of the Ribosome	269
5. Concluding Remarks	271
Acknowledgments	272
Abbreviations	272
References	273
<b>10 METAL ION REQUIREMENTS IN ARTIFICIAL RIBOZYMES THAT CATALYZE AMINOACYLATION AND REDOX REACTIONS</b>	<b>277</b>
<i>Hiroaki Suga, Kazuki Futai, and Koichiro Jin</i>	
Abstract	278
1. Introduction	278
2. Flexizymes	279
3. Redox Ribozymes	288

CONTENTS	xv
4. Conclusions	294
Acknowledgments	294
Abbreviations	294
References	295
<b>11 METAL ION BINDING AND FUNCTION IN NATURAL AND ARTIFICIAL SMALL RNA ENZYMES FROM A STRUCTURAL PERSPECTIVE</b>	299
<i>Joseph E. Wedekind</i>	
Abstract	300
1. Introduction	301
2. Expectations of Metal Binding and Crystallographic Observations	304
3. Metal Ion Binding and Function in the Structures of Natural and Artificial Ribozymes	309
4. Conclusions and Future Prospects	334
Acknowledgments	337
Abbreviations	337
References	338
<b>12 BINDING OF KINETICALLY INERT METAL IONS TO RNA: THE CASE OF PLATINUM(II)</b>	347
<i>Erich G. Chapman, Alethia A. Hostetter, Maire F. Osborn, Amanda L. Miller, and Victoria J. DeRose</i>	
Abstract	348
1. Introduction	348
2. Pt(II) Compounds: Properties and Biological Distribution	350
3. Pt(II) Compounds and RNA Processes	358
4. <i>In Vitro</i> Studies of RNA-Pt(II) Adducts	361
5. Structural Features of Pt(II)-Nucleic Acid Adducts	368
6. Concluding Remarks	371
Acknowledgments	372
Abbreviations	373
References	373
SUBJECT INDEX	379
