

# Acknowledgements

The present volume is the outcome of a large-scale collaborative project on universal and areal patterns of grammaticalization, based at the University of Mainz. The financial help from the German Research Foundation of our project “Cross-linguistic variation in grammaticalization processes and areal patterns of grammaticalization” (Bi 591/12-1) is gratefully acknowledged. We are very much indebted to our authors for their contributions and for their useful discussions in the course of our internal reviewing. In particular, we would like to thank Christian Lehmann, Martin Haspelmath, Marianne Mithun and Denis Creissels for their advice and constructive critique. We would also like to thank our excellent MAGRAM team (<https://www.linguistik.fb05.uni-mainz.de/magram/>) for their engagement: Linlin Sun, Iris Rieder, Marvin Martiny, Eduard Schröder and Svenja Luell. Our thanks also go to Arne Nagels and Laura Becker for advice on statistical matters, and to Uta Reinöhl for stimulating discussions. Finally, we would like to express a big thank you to Barbara Karlson and Birgit Sievert at Mouton for their encouragement and patience, as well as to Dagmar Hanzlíková for excellent copy-editing and to Andreas Brandmair for his help at the last stages of the production of the volume.

Mainz, 10 March 2020

Walter Bisang and Andrej Malchukov
