Preface — V

List of contributors — XI

1 The elements

Jean-Claude G. Bünzli

1.1 Discovery of the rare-earth elements — 3

Tom Lorenz, Martin Bertau, Robert Möckel

1.2 Rare-earth minerals and rare-earth mining — 15

Tom Lorenz, Martin Bertau

1.3 Rare earth resources and processing — 37

Tom Lorenz, Martin Bertau

1.4 Rare earth metal production and refinement — 49

Tom Lorenz, Martin Bertau

1.5 Recycling aspects – magnets — 55

Jörg Zimmermann

1.6 Recycling aspects – phosphors — 69

Rainer Pöttgen

1.7 The structures of the elements — 75

Mikhail G. Brik, Alok M. Srivastava

1.8 Electronic properties of the lanthanide ions — 83

2 Reactivity and compounds

Mathias Wickleder

2.1 Halides of trivalent lanthanides — 99

Mathias Wickleder

2.2 Lanthanide compounds with tetrahedral oxoanions — 117

Arndt Simon

2.3 Lanthanide compounds with low valence — 137

Oliver Janka, Rainer Pöttgen

2.4 Intermetallic compounds — 157

Bassem S. Bassil, Ulrich Kortz

2.5 Polyoxometalates — 171

Jean-Claude G. Bünzli

2.6 Coordination chemistry — 185

Marc D. Walter, Grégory Nocton

2.7 Organometallic rare-earth chemistry — 201

3 Characterization and properties

Michael Sperling, Maximilian von Bremen-Kühne, Sabrina Funke,
Lukas Schlatt, Uwe Karst

3.1 Analysis of rare-earth metals and their species — 225

Walter Rambeck, Kerstin Redling, Cristian A. Strassert

3.2 Rare earth toxicology — 235

Reinhard K. Kremer

3.3 Rare earths magnetism – condensed matter — 249

Jan van Leusen, Paul Kögerler

3.4 Rare earth magnetism – molecules — 277

Florian Baur, Thomas Jüstel

3.5 Optical characterization — 289

Hellmut Eckert, Rainer Pöttgen

3.6 Solid-state NMR and Mößbauer spectroscopy — 299

Hellmut Eckert

3.7 Rare-earth ion spin dynamics as a source of structural information — 323

Michael Bredol

3.8 Electrical and dielectric properties — 349

4 Materials and applications

Michael Seitz

4.1 Optical materials – molecules — 365

Thomas Jüstel, Florian Baur

4.2 Optical materials – microcrystalline powders — 375

Jan Werner

4.3 Optical materials – ceramics — 391

Daniel Rytz, Klaus Dupré, Andreas Gross, Christoph Liebald, Mark Peltz,
Patrick Pues, Sebastian Schwung, Volker Wesemann

**4.4 Crystal growth of rare-earth doped and rare-earth containing
materials — 415**

Andreas Faust

4.5 Medical applications of rare earth compounds — 439

Cees Ronda

4.6 Rare earth-based scintillators — 453

Klaus Stöwe, Marc Armbrüster

4.7 Rare earth metals in heterogeneous catalysis — 463

Yaroslav Mudryk, Vitalij K. Pecharsky

4.8 Materials for solid state cooling — 487

Holger Kohlmann

4.9 Rare earth metal-based hydride materials — 511

Niko Hildebrandt, Loïc J. Charbonnière

4.10 Lanthanide nanoparticles and their biological applications — 525

Marina M. Lezhnina, Ulrich Kynast

4.11 Rare-earth-based hybrid materials — 537

Dirk Johrendt

4.12 Rare earth based superconducting materials — 557

Hellmut Eckert

4.13 Rare-earth-containing glasses — 577

Lena J. Daumann

4.14 Bioinorganic chemistry of the elements — 601

Marc Wentker, Thomas Jüstel, Jens Leker

4.15 Economic aspects — 611

Subject Index — 629

Formula Index — 645
