

## About the authors

**Altenbuchner, Amelie, M. A.** holds a master's degree in Educational Science. She has been working as a research fellow in social science and health related research projects at the Institute for Social Research and Technology Assessment (IST) at the University of Applied Science Regensburg (OTH) since 2013. In past research projects, she mainly focused on quantitative methods, with a growing interest in mixed-method design studies as well as on adjusting instruments to special subject groups, like geriatric patients. She has an excellent experience in conducting research projects in interdisciplinary and multi-professional teams.

**Aparicio, Manuel, PhD** is lecturer in Philosophy at the University of Murcia, Spain. His main research topics involve human rights and disability studies.

**Arian, Shabahang** holds a LL.B. degree from the University of Isfahan and a Masters of Law (LLM) in Business Law and Comparative Law from Dale E. Fowler, School of Law, Chapman University, California. She also qualified as a practicing attorney in Iran. Since 2018, Shabahang is a PhD candidate at the Dirpolis Institute, Scuola Superiore Sant'Anna in Pisa, Italy. Her research focuses on artificial intelligence and robotics, bio-ethics, robo-ethics, medical law, technology law, data protection and privacy law. In addition, she is an active researcher on European research projects such as INBOTS H2020 and H2020-FETPROACT. She is a member of the EURA Centre of Excellence on the Regulation of Robotics and AI.

**Ausín, Txetxu, PhD** is tenured scientist at the Institute for Philosophy, CSIC (Spanish National Research Council). He is the Director of the Applied Ethics Group (GEA). His research areas involve public ethics, bioethics, deontic logic, human rights, and philosophy of robotics and ICT. He was member of OECD Expert Group on Research ethics and new forms of data for social and economic research.

**Balzer, Katrin, Prof. Dr. rer. cur.,** is a nursing scientist and holds a professorship of evidence-based nursing at the University of Lübeck, Institute for Social Medicine and Epidemiology. Her main research area is the development and evaluation of complex interventions to advance nursing and inter-professional care for vulnerable elderly individuals in acute and long-term care settings. Among others, this work includes the ACTIVATE project (<https://projekt-activate.de/en/about-activate/>) where she leads the work streams related to the early requirement analyses, the clinical evaluation of the socio-technical support system and the evaluation of ethical, legal and social implications.

**Bertolini, Andrea, PhD, LL.M. (Yale),** is an assistant professor of private law at the Scuola Superiore Sant'Anna in Pisa (SSSA). His research ranges from private law to technology regulation (robotics and AI) with a comparative and functional approach. He coordinated a number of national and European projects on issues of regulation of robotics and AI. Since October 2018, he directs the European Centre of Excellence on the Regulation of Robotics and AI (EURA), funded by the European Commission under the Jean Monnet Action. On such matters, he is often heard as an expert by policy

makers and international organizations, and has written studies and expert opinions, for the European Parliament and Commission.

**Dinand, Claudia**, a doctoral student at the Department of Nursing Science at Witten/Herdecke University. Until december 2019 she was part of the research group care interventions. In her work, she focusses on frontotemporal dementia from a nursing perspective paying special attention to the specific living situations, experiences, needs and coping strategies of persons with young onset dementia.

**Dockweiler, Christoph**, Jun.-Prof. Dr., graduated with a degree from Bielefeld University in Health Communication (B.Sc.) and Public Health (M.Sc.). Since 2018 he is professor and head of the Centre for ePublic Research (CePHR) at the School of Public Health, Bielefeld University. His research focuses on information and communication technologies in health promotion, prevention and care with special emphasis on their social and ethical implications.

**Gustafsson, Christine**, received her PhD in gerontological caring at Karolinska Institutet in Sweden. She is currently holding the position of an associate professor at Mälardalen University, Sweden at the School of Health, Care and Social Welfare. Her research interest is in elderly care and intellectual disability practice, with a particular interest in health and welfare technology.

**Halek, Margareta**, Prof. Dr. rer medic., professor of Nursing Science at and head of the Department of Nursing Science at Witten/Herdecke University. Before that she was the leader of the research group care interventions at the German Center for Neurodegenerative Disease (DZNE) in Witten for 10 years. She works in the field of geriatric nursing research for more than 15 years, since 2005 especially in the field of dementia care. Her research focus is the behaviour of people with dementia, on the understanding of underlining social processes and nursing intervention for geriatric population.

**Haltaufderheide, Joschka**, Dr. phil, M. A. studied Comparative Literature and Philosophy and graded with distinction. He wrote his PhD-thesis on the theoretical foundations of ethics of risk in 2015. Now, he works at the Institute for Medical Ethics and History of Medicine, Ruhr-University Bochum, Germany. His research focus is on questions of ethical expertise and conceptual questions of ethics consultation as well as ethical implications of new bio- and biomedical technologies. He is co-founder of the working group “health & digitization” at the German Academy for Ethics in Medicine.

**Hauptelshofer, Anna**, M. A. is a social and educational scientist and a registered nurse with geriatric-psychiatric qualification (B.Sc.). Her research focuses on the digitalization and digital transformation of nursing care. In this context, she concentrates on the profession and roles of nurses as well as on the promotion of eHealth literacy of older people.

**Hennala, Lea**, PhD (Innovation systems), is a senior researcher at Lappeenranta-Lahti University of Technology LUT, School of Engineering Science, Finland. Her research areas include e.g. implementation and use of care robots in elderly care,

user-involvement and co-creation of service innovations in both public and private sectors.

**Hoppe, Julia Amelie**, M.Sc. is PhD student at the chair of Organizational Behavior at Paderborn University, Germany. Her research interest is in human-machine interaction and in collaboration at work especially collaboration in teams.

**Hovemann, Johanna**, M. A. studied Social Science with a focus on the health-care system and wrote her master thesis about the orientation to living conditions (setting approach) in prevention and health promotion measures. Currently, she is a researcher at the Institute for Medical Ethics and History of Medicine, Ruhr-University Bochum, Germany. Her primary field of interest is ethical aspects of upcoming social assistive technologies in the healthcare sector.

**Johansson-Pajala, Rose-Marie**, received her PhD in caring sciences in the School of Health, Care and Social Welfare at Mälardalen University, Sweden, where she currently is a Senior Lecturer in medical science. Her research interest is in elderly care, with a particular interest in welfare technology.

**Loosman, Iris**, M. A. is a PhD student at the Department of Philosophy & Ethics at the Eindhoven University of Technology. Her research focuses on rethinking trust and consent in mobile health systems and is part of a larger interdisciplinary project called Mobile Support Systems for Behavior Change. This NWO-MVI funded 'responsible innovation' project combines expertise from psychology, ethics, AI and cognitive science. Previously Iris obtained a BA and MA in philosophy from Utrecht University, where she focused on medical ethics and moral psychology.

**López, Daniel** is predoctoral researcher at the Institute for Philosophy, CSIC (Spanish National Research Council). He is member of Applied Ethics Group (GEA). His research areas involve infoethics, roboethics, marketing ethics and philosophy of technology and ICT.

**Lundgren, Björn** has a PhD in Philosophy from the Royal Institute of Technology (2018). He is currently working as researcher at the Institute for Futures Studies (Sweden). At the Institute he is leading a project on ethical and societal aspects of the implementation of autonomous vehicles (funded by the Swedish Transport Administration) and he has previously consulted for University of Twente (The Netherlands) in two EU-projects (SHERPA and SIENNA), mainly to help with the production of ethical guidelines for AI and AI and Robotics. Lundgren's research is available in various international journals such as Journal of Ethics, Philosophia, Philosophy & Technology, Science & Engineering Ethics, and Synthese.

**Meier, Pascal**, M.Sc., studied Information Systems at the University of Osnabrück and has been working as a research assistant at the Department of Business Accounting and Business Informatics at the University of Osnabrück since 2016. He is working on the user-centered development of a platform for the integration of various services provided in everyday life in rural areas. His research focuses on user-centered design, multi-sided platforms, and language-based assistants.

**Melkas, Helinä**, D.Sc. (Tech.), is professor of Industrial Engineering and Management, especially Service Innovations at Lappeenranta-Lahti University of Technology LUT, School of Engineering Science, Finland. Her research focus is digitalisation, well-being technology, gerontechnology, robotics, service innovation, and user involvement.

**Monasterio, Aníbal**, PhD, is a Basque Government Posdoctoral Researcher. His research lies at the intersection of the cognitive, biological and social sciences exploring their philosophical underpinnings. He is a member of international (and national) research projects such as for example, EXTEND and INBOTS (Horizon 2020). He explores topics such as roboethics, machine ethics, ethics of AI, data ethics, ethics of neurotechnology, human enhancement, space ethics, applied ethics, bioethics, philosophy of neuroscience, philosophy of psychiatry, altruism, cooperation or philosophy of network science and complexity. Aníbal graduated in Philosophy (Universidad de Deusto) and obtained his PhD in Cognitive Science and Humanities at the Universidad del País Vasco/Euskal Herriko Unibertsitatea with a dissertation on social cognition.

**Morte, Ricardo**, lawyer, Lead Auditor ISO 27001, Data Protection and IT Security Consultant, PhD candidate University of Granada. His research areas involve fundamental rights, applied ethics, data protection and privacy.

**Palmdorf, Sarah**, M.Sc., is a registered nurse and has practical experience especially in long-term care. She graduated from Witten/Herdecke University with a degree in Nursing Science (M.Sc.). She is employed as a research associate at the Centre for ePublic Research (CePHR) at Bielefeld University. There, she is working towards a Ph.D. in Public Health on technical support for people with dementia and relatives.

**Pekkarinen, Satu**, PhD (Innovation systems), is a senior researcher in Lappeenranta-Lahti University of Technology LUT, School of Engineering Science, Finland. Her research interests are related to the relationships between technology, services and users, both from theoretical and practical viewpoints. Her research areas include e. g. implementation and use of care robots, and socio-technical transition in elderly care.

**Remmers, Hartmut**, Prof. Dr. phil. habil., is a professor for Nursing Science at the Ruprecht-Karls-University Heidelberg, Institute for Gerontology, Germany. He studied Sociology, Philosophy, History and Social Psychology and works in the field of nursing ethics and medical ethics as well as on concepts of care and theory of nursing.

**Schley, Angelika**, M. A., is a research associate in nursing research at the University of Lübeck, Institute for Social Medicine and Epidemiology. Her research topics are communication between mechanically ventilated patients and nurses in ICUs, ethical, legal and social evaluation of emerging digital technologies to support patients and nurses, and cultural diversity in nursing. She holds an M. A. in Social and Cultural Anthropology from University of Hamburg and is a Registered Nurse.

**Schmietow, Bettina**, Dr. phil., is a postdoctoral researcher at the Institute of Ethics, History and Theory of Medicine, Ludwig-Maximilians-Universität München, Ger-

many. She currently focusses on the research project “Medicine 4.0 – the ethical basis of digitalised healthcare” funded by the Federal ministry of health and in cooperation with the Institute for Healthcare Management and Health Sciences at the University of Bayreuth. Besides the ethics of digitalised healthcare, her research interests concern the ethics of genetic technologies, participation and innovation in medicine and life sciences, as well as methodologies of interdisciplinary bioethics.

**Thommes, Kirsten**, Prof. Dr., is professor for Organizational Behavior at Padernborn University, Germany. In her research, she focuses on radical shifts in firms’ institutional environment and co-creation and collaboration in teams. In her current research, she is especially interested in human-machine interaction and collaboration at work.

**Toboso, Mario**, PhD, is tenured scientist at the Department of Science, Technology and Society in the Institute of Philosophy of the Spanish National Research Council (CSIC). His research topics focus on: Studies on Science, Technology and Society; Disability Studies; Disability in Amartya Sen’s Approach; Studies on Functional Diversity; Accessibility and Inclusive Designs; Social and Community Innovation; and Philosophy of Time.

**Tuisku, Outi**, PhD, received her M.Sc. degree in computer science in 2008 and her Ph.D. degree in interactive technology in 2014 from the University of Tampere, Finland. Currently she works as a post-doctoral researcher at the Lappeenranta-Lahti University of Technology LUT, Finland, where her work is connected to LUT research platform on Smart Services for Digitalisation (DIGI-USER)

**Weber, Karsten**, Prof. Dr. phil. habil., currently serves as director of the Regensburg Center of Health Sciences and Technology as well as co-head of the Institute for Social Research and Technology Assessment (IST) at Technical University of Applied Sciences Regensburg/Germany. Since 2007 he also holds an honorary professorship for Culture and Technology at Brandenburg University of Technology Cottbus-Senftenberg/Germany. The main research interests of Prof. Weber are applied ethics, particularly ethics of technology, information ethics, and bioethics as far as human enhancement is concerned. Additionally, he works on technology assessment with regard to social impacts of ICT.

**Wiertz, Svenja**, M. A., works as a research and teaching associate at the International Center for Ethics in the Sciences and Humanities at Tübingen University. She studied philosophy at Düsseldorf University and completed her PhD on Philosophical Conceptions of Friendship in the Context of Contemporary Processes of Social Change. Her current research focuses on ethical considerations in contexts of human-robot-interaction as well as the influence of digitalization on personal relationships.

**Vollmann, Jochen**, Prof. Dr. med Dr. phil., is Director of the Institute for Medical Ethics and History of Medicine, Ruhr-University Bochum since 2005. After his medical education as specialist in psychiatry, Jochen Vollmann worked at the Kennedy Institute of Ethics, Georgetown University, Washington, DC, and habilitated in 1998 with a work on ethical questions of information giving and informed consent in medicine.

His research interest lies in ethical questions of patients' autonomy and informed consent as well as several other issues in clinical and empirical medical ethics. In recent years, three working groups for young researchers and several Young scholars' conferences were established and organized under his supervision.
