

## Acknowledgements

Our heartfelt thanks go out to all of the colleagues and friends who have supported us over the course of this endeavor. We wish to extend special thanks to the former rectorate of the University of Basel, Antonio Loprieno and Maarten J.F.M. Hoenen, who supported our endeavor from its very beginning, to Ueli Dill, head of the manuscripts section of the Sammlung für Alte Handschriften at the University of Basel Library, and to Christoph Ballmer, Francesco Carmenati, Annemarie Dietsche, and Caroline Madörin, also at the University Library. We also would like to express our gratitude to the Digital Humanities Lab at the University of Basel and particularly to Peter Fornaro. We thank Reinhold Scholl and his team in Leipzig who enable us to feed our metadata into the online database papyrusportal.de, a project funded by the German Research Foundation, and Rodney Ast and James Cowey for papyri.info and more general digital papyrology training sessions offered to our students. We thank also our student assistants, Timo Bertschin, and Audric Wannaz who helped us with archival research and organizational matters. We are also grateful to Paul Schubert, Andrea Jördens, Paul Heilporn, Roger Bagnall, Jean-Luc Fournet, Alain Delattre, Yasmine Amory, Diliana Atanassova, Heike Behlmer, Anne Boud'hors, Paola Buzi, Emanuele Castelli, Jennifer Cromwell, Stephen Emmel, Nikolaos Gonis, François-René Herbin, Bentley Layton, Agnes Mihálykó, Gesa Schenke, Alin Suciu, and Susanne Töpfer, for their valuable comments and critical readings. Serena Causo, Dario Internullo, Stefanie Schmidt, and Naïm Vanthieghem contributed further editions to this volume. Eleonora Kacł and Matthias Müller prepared the manuscript for publication, and Matthias Stern prepared the indices. Last but not least, we would like to express our thanks to the editors of this series for including the edition of the Basel papyri in the Beihefte of the Archiv für Papyrusforschung.

This edition project was made possible by a generous grant from the Swiss National Science Foundation (SNSF n° 100015\_159538: “Von frühen Christen, wilhelminischen Gelehrten und Nanotechnologen – Neue Herangehensweisen an Basler Zeugnisse aus der ägyptischen Wüste.”) We thank the SNSF for the support.

May 2019
