List of Contributors

Alessandra Campo is Postdoctoral Research Fellow in Theoretical Philosophy at the University of L’Aquila. She has been dealing with the relationship between philosophy and psychoanalysis, in particular regarding the metaphysical and cosmological implications (Bergson, Whitehead and Deleuze) of Freudian-Lacanian theory of temporality. Her current research is devoted to Kantian philosophy. She is the author of several essays and collaborates with several journals. She is the author of two books: Tardività. Freud dopo Lacan (2018) and Fantasma e sensazione. Lacan with Kant (2020).

Simone Gozzano is Full Professor of Philosophy of Mind and Metaphysics at the University of L’Aquila (Ph.D. Genoa). He is the author of four monographs – on intentionality, mind-body identity and consciousness – and the co-editor of three books. He was a visiting scholar at Tufts, Rutgers, Durham and Jiao Tong. He has extensively published on animals’ mind, mind-body identity and the metaphysics of mind. Recently, he is defending a dispositional approach to mental properties.

Carlo Rovelli is a theoretical physicist known for his work in quantum gravity. He has founded the Quantum Gravity group of the Aix-Marseille University. He is member of the Institute Universitaire de France, honorary professor of the Beijing Normal University and member of the Académie Internationale de Philosophie des Sciences. He has written global best sellers among which: Seven Brief Lesson on Physics translated in 44 languages; The Order of Time and Helgoland. He has been included by the Foreign Policy magazine in the 2019 list of the 100 most influential global thinkers.

Etienne Klein is physicist at CEA, the French Atomic Energy Commission, at Saclay near Paris. Since 2007, he is the Director of the Research Laboratory on Matter Sciences at CEA (LAR-SIM). His research interests include the foundations of physics, the interpretation of quantum mechanics, the question of time in physics and the relationship between science and society. He is professor at Ecole Centrale Supélec. He is member of the French Academy of Technologies.

Yuval Dolev is an Associate Professor at the Bar Ilan university, Israel. He received his PhD from Harvard University. In 2007 he published Time and Realism (MIT press), and in 2016 he co-edited with Michael Roubach a volume entitled Cosmological and Psychological Time (Springer). His published papers focus on the philosophy of time, philosophy of physics and the philosophy of perception, and draw equally from works in the analytic tradition and from phenomenology.

Matteo Morganti is an Associate Professor at the University of Rome Tre. His research focuses on the general philosophy of science and on the interplay between analytic metaphysics and contemporary physics. He is especially interested in the debate concerning scientific realism and antirealism and in issues surrounding the interpretation of quantum mechanics. He is the author of ‘Combining Science and Metaphysics’ (Palgrave Macmillan, 2013) as well as of several articles in international journals and edited collections.
Donatella Donati is Postdoctoral Research Fellow at the University of L’Aquila. Her main research interests concern the metaphysics of properties, causation, modality and time. She got her PhD from the University of Nottingham, where she worked on the intersection between dispositional properties and the philosophy of time. During her PhD she was visiting scholar at Columbia University (New York, USA), at the Norwegian University of Life Science (Ås, Norway) and at the Centre for the Philosophy of Time based at the University of Milan (Italy). She is also interested in AI and trust.

Mauro Dorato received a MA in Philosophy and Mathematics from La Sapienza, and a Ph.D. in Philosophy at the Johns Hopkins University. He is full Professor of philosophy of science at the University Roma 3. He is a member of the Academy of Europe and of the Académie Internationale des Philosophie des sciences and has been president of the Italian Society for History and Philosophy of Science. He was co-editor of the European Journal for Philosophy of Science. He has published widely in international and Italian journals and is the author of 5 monographs.

Paul-Antoine Miquel is Full Professor in Contemporary Philosophy at Toulouse 2 University. His research is focused on biological organization. He has published on Bergson and the French philosophy of life from a point of view that is indissociably epistemological and metaphysical. Among his papers: (co-ed.) From Biological Determination to Entangled Causation, in: Acta Biotheoretica, 67, 1 (2019), 19–46; (co-ed.) Symmetry breaking and functional incompleteness in biological systems, in: Progress in Biophysics and Molecular Biology, 150, (2020), 1–12.

Rocco Ronchi is Full Professor of Theoretical Philosophy at the University of L’Aquila. He directs the school of philosophy “Praxis”. He is a member of the Société des Amis de Bergson. He teaches in various Italian and foreign universities. Among his most recent publications: Il canone minore. Verso una filosofia della natura (2017 – French translation La ligne mineure, Pour une philosophie de la nature – 2020); Bertolt Brecht. Tre dispositivi (2017). With Bernard Stiegler, he is the author of L’ingovernabile: due lezioni sulla politica (2019).

Pierre Montevello is Full Professor in Contemporary Philosophy at Toulouse 2 University. He has worked on the thought of Nietzsche, Maine de Biran, Ravaission, Bergson, Deleuze. He is a member of the Société des Amis de Bergson. Among his works: Précarité ontologique et consistance des êtres (2019) ; Métaphysiques cosmomorphes. La fin du monde humain (2015) ; Deleuze: la passion de la pensée (2008) ; Nature et subjectivité (2007) ; Nietzsche: la volonté de puissance (2001).

Eugenio Coccia is an experimental physicist in the field of astroparticle physics, with a focus on the search for gravitational waves. He is internationally recognized for the development of
gravitational wave detectors and is one of the authors of the discovery of gravitational waves with the LIGO-Virgo Collaboration. He is at present Professor of Physics and Rector of the “Gran Sasso Science Institute”, school of advanced studies in L'Aquila. Among his last books: with J. Silk, N. Vittorio, Gravitational Waves and Cosmology IOS Press and Sif (2020).

Christian Wüthrich is Associate Professor of Philosophy at the University of Geneva. He works in philosophy of physics, philosophy of science, and metaphysics. The primary focus of his research has long been the philosophy of quantum gravity, but also includes the philosophy of space and time, time travel, modality and laws of nature, emergence and reduction. He is the Founder and Director of the Geneva Symmetry Group and the Co-Director of the ‘Beyond Spacetime’ research project, funded by NSF, FQXi, John Templeton Foundation, and ACLS (www.beyondspacetime.net).

Michel Weber is Director of the Centre for Philosophical Practice (Brussels) and Adjunct Professor at the Department of Educational Foundations of the University of Saskatchewan. He has worked on Whitehead's process philosophy. His current research program mainly deals with political philosophy and the philosophy of psychiatry. He is the author of fifteen monographs, among which: The Political Vindication of Radical Empiricism (2016). He is the (co-) editor of forty books, among which: with Will Desmond, Handbook of Whiteheadian Process Thought (2008).

Luca Vanzago is Full Professor of Theoretical Philosophy at the University of Pavia. He is member of the European Society for Process Thought, the Merleau-Ponty Circle and the Italian Society of Merleau-Ponty's studies. He is member of the board of the journals Paradigmi, Discipline filosofiche, Chiasmi International, Philosophical Inquiries, Epekeina and SHIFT. He is member of the Istituto Lombardo di Scienze e Lettere. His works deal with phenomenology and process philosophy. He has published nine books and more than 60 papers in international philosophical journals.

Matthew D. Segall, PhD, is Assistant Professor in the Philosophy, Cosmology, and Consciousness program at California Institute of Integral Studies in San Francisco, where he teaches courses primarily on German Idealism and Alfred North Whitehead's process philosophy. He is the author of Physics of the World-Soul: Whitehead's Adventure in Cosmology (2021) and has published journal articles and book chapters on a wide range of topics including panpsychist metaphysics, media theory, the philosophy of biology, the evolution of religion, and psychedelics.

Claudio Calosi is Assistant Professor at the University of Geneva and Visiting Professor at USI, Lugano—MAP. He also lead the SNF-funded project: Metaphysics of Quantum Objects. He works mainly in Analytic Metaphysics and Philosophy of Physics. The results of his research have been published in Philosophy of Science, the British Journal for the Philosophy of Science, Studies in History and Philosophy of Modern Physics, Foundations of Physics, The Philosophical Quarterly, Philosophical Studies and Analysis to mention a few.

Jean-Claude Dumoncel is Professor at the Centre for Theological Studies in Caen where he teaches logic and philosophy of nature. He has published on Whitehead's philosophy, modal logic and philosophy of maths. Among his works: Philosophie des mathématiques (2018);

Marc Wittmann, Ph.D., is employed at the Institute for Frontier Areas of Psychology and Mental Health in Freiburg. He studied Psychology and Philosophy at the University of Fribourg and the Ludwig-Maximilian University (LMU) in Munich. He received his Ph.D. (1997) and his Habilitation (2007) at the Institute of Medical Psychology, Medical School, LMU Munich. Between 2004 and 2009 he was Research Fellow at the Department of Psychiatry, University of California San Diego. He is author of more than 100 peer-reviewed articles and the MIT Press books Felt Time (2016) and Altered States of Consciousness (2018).

Giuseppe Longo is DRE CNRS, Ecole Normale Supérieure, Paris and a former Professor of Mathematical Logic and of Computer Science, University of Pisa. He spent three years in the USA as researcher and Visiting Professor. He recently extended his research interests to Theoretical Biology and Epistemology, focusing on historical correlations and on alternatives to the new alliance between computational formalisms and the governance of man and nature by algorithms and by supposedly objective “optimality” methods. Web page: http://www.di.ens.fr/users/longo/.

Marco Bersanelli is Full Professor of Astrophysics at Milano University. He works in the field of observational cosmology, in particular on measurements of the cosmic microwave background. He worked at LBL, Berkeley, and participated in two campaigns at the Amundsen-Scott station at the South Pole. He played a leading role in the ESA Planck space mission. He published over 300 refereed papers and a number of books and essays on interdisciplinary subjects. He is president of Fondazione Sacro Cuore.
