<b>Chapter 1. On the ill-posedness of coefficient inverse problems and the general approach to the study of them</b>	<b>1</b>
<b>Chapter 2. Determining the coefficient for the lowest term of equation</b>	<b>7</b>
2.1. Setting of the problem. Determination of the coefficient . . . . .	7
2.2. The difference quasi-inversion problem . . . . .	10
2.3. A test example . . . . .	14
<b>Chapter 3. Determining of the coefficient for the leading terms of equation</b>	<b>21</b>
3.1. Statement of the problem . . . . .	21
3.2. The quasi-inversion problem and an estimate of stability of its solution . . . . .	23
3.3. Simplification of equation of the quasi-inversion method . . . . .	25
3.4. Simplification of the quasi-inversion problem . . . . .	36
3.5. Finding the coefficient . . . . .	41
3.6. Difference quasi-inversion problem . . . . .	51
3.7. Numerical solution of the quasi-inversion problem . . . . .	57
3.8. Results of solution of a test example problem . . . . .	64
<b>Chapter 4. Modification of the method of determining the coefficient of the leading terms in an equation</b>	<b>67</b>
4.1. Modification method . . . . .	67
4.2. Defining a coefficient . . . . .	73
4.3. On deriving the main integro-differential equation . . . . .	78

<b>Chapter 5. Generalization of the developed algorithm for solving coefficient inversion problem</b>	<b>83</b>
<b>Chapter 6. On applications of coefficient inverse problems in underground fluid dynamics</b>	<b>87</b>
6.1. Determining of filtration parameters of exploited non-homogeneous oil strata . . . . .	87
6.2. Determining the filtration parameters in the case of non-linear filtration . . . . .	91
6.3. The quasi-inversion problem for the considered cases . . . . .	101
<b>Summary</b>	<b>103</b>
<b>Bibliography</b>	<b>105</b>
