Zhongwei Shen, *Lexington*

Luis Silvestre, *Chicago*

Yoshihiro Tonegawa, *Tokyo*

Guofang Wang, *Freiburg*

DE GRUYTER

**ADVANCES IN CALCULUS OF VARIATIONS** publishes high quality original research focusing on that part of calculus of variation and related applications which combines tools and methods from partial differential equations with geometrical techniques.

In particular the journal will include the following topics: existence and regularity for minimizers and critical points; variational methods for partial differential equations; geometrical aspects of calculus of variation: minimal surfaces, harmonic mappings, geometrically motivated flows, curvature equations, quasi-conformal mappings; applications of variational methods to non-linear elasticity, free boundary problems, general relativity; geometric measure theory.

ISSN 1864-8258 · e-ISSN 1864-8266 · CODEN ACVDAS

## Contents

Chang-Yu Guo, Stanislav Hencl, Ville Tengvall

**Mappings of finite distortion: Size of the branch set — 325**

Christian Ketterer

**Lagrangian calculus for nonsymmetric diffusion operators — 361**

Xiayang Shi, Vicențiu D. Rădulescu, Dušan D. Repovš, Qihu Zhang

**Multiple solutions of double phase variational problems with variable exponent — 385**

Giovanni Molica Bisci

**A group-theoretical approach for nonlinear Schrödinger equations — 403**

Gianni Dal Maso, Lucia De Luca

**A minimization approach to the wave equation on time-dependent domains — 425**
