Annamaria Canino, Berardino Sciunzi,
Alessandro Trombetta

On the moving plane method for boundary blow-up solutions to semilinear elliptic equations — 1

Fredrik Arbo Høeg, Peter Lindqvist

Regularity of solutions of the parabolic normalized p -Laplace equation — 7

Pierluigi Colli, Takeshi Fukao

Cahn–Hilliard equation on the boundary with bulk condition of Allen–Cahn type — 16

Ahmed Mohammed, Vicențiu D. Rădulescu, Antonio Vitolo
Blow-up solutions for fully nonlinear equations: Existence, asymptotic estimates and uniqueness — 39

Michiel Bertsch, Flavia Smarrazzo, Andrea Terracina,
Alberto Tesei

Radon measure-valued solutions of first order scalar conservation laws — 65

Claudianor O. Alves, Grey Ercole,
M. Daniel Huamán Bolaños

Ground state solutions for a semilinear elliptic problem with critical-subcritical growth — 108

Vieri Benci, Lorenzo Luperi Baglini, Marco Squassina
Generalized solutions of variational problems and applications — 124

Sitong Chen, Binlin Zhang, Xianhua Tang

Existence and non-existence results for Kirchhoff-type problems with convolution nonlinearity — 148

Marek Niezgodą

Nonlinear Sherman-type inequalities — 168

Luigi C. Berselli, Michael Růžička

Global regularity for systems with p -structure depending on the symmetric gradient — 176

Jesús Ildefonso Díaz, David Gómez-Castro,

Alexander V. Podolskiy, Tatiana A. Shaposhnikova

Homogenization of a net of periodic critically scaled boundary obstacles related to reverse osmosis “nano-composite” membranes — 193

Nikolaos S. Papageorgiou, Chao Zhang

Noncoercive resonant $(p, 2)$ -equations with concave terms — 228

Fernando Miranda, José Francisco Rodrigues, Lisa Santos

Evolutionary quasi-variational and variational inequalities with constraints on the derivatives — 250

Francesco Della Pietra, Giuseppina di Blasio,
Nunzia Gavitone

Sharp estimates on the first Dirichlet eigenvalue of nonlinear elliptic operators via maximum principle — 278
