Monografien, Aufsätze und Vorträge aus dem Jahr 2018/19 mit Nachträgen aus den beiden Vorjahren

<https://doi.org/10.1515/bfp-2020-0020>

Die von Wilbert Ubbens und Dr. Willi Höfig im Jahr 1982 begründete und bis zum Jahr 2002 jeweils in Heft 3 dieser Zeitschrift veröffentlichte Bibliografie wird mit der vorliegenden Übersicht fortgesetzt. Die Gliederung nach Schlagwörtern und die Zitierweise wurden weitgehend beibehalten, um sowohl die Orientierung zu erleichtern als auch spätere Hinweise auf diese Bibliografie zu vereinfachen. Für diese Übersicht wurden auch wieder Nachweise aus den verwandten Bereichen der Archive, Dokumentationsstellen und Museen aufgenommen, um die für Zeitungen wünschenswerte spartenübergreifende Zusammenarbeit zu fördern.

Allgemeines

Z 18/01 Lee, Shin-Lian: App-News via Smartphone – Die Zeitung der Zukunft? Dissertation an der Humboldt-Universität zu Berlin, 2019. [Das Smartphone bietet vielfältige Möglichkeiten der Information, Kommunikation und Präsentation. Auch Zeitungsverlage sehen im Smartphone einen neuen Übertragungskanal für Nachrichten aller Art. Die Kernfrage der Arbeit ist, ob die traditionelle Übertragungsform der Medieninhalte zukünftig durch den digitalen Distributionskanal von Content (App) vollständig abgelöst wird und der klassische Informationsträger (Druckpapier) auf dem Markt gänzlich verschwindet. [When the IFLA Reference and Information Services Section decided to use a debate format for its session at the association's 2019 World Library & Information Congress, one of the debate topics was, "Reference and information services will be less important when all content is open access." In the social sciences and humanities, there's philosophical support for OA, but the reality is that little research is grant-supported and much is published in books rather than journal articles. No one seriously expects newspapers to be free, although we enjoy a smattering of free newspaper articles on their websites, nor do people object to paying for magazines such as people or sports illustrated].

[Providing online access to historical newspaper content is a strategic priority for many libraries. This was the case when the University Libraries adopted the open-source “Open ONI” platform in creating its Pennsylvania Newspaper Archive (<http://panewsarchive.psu.edu>), replacing its aging Olive Software ActivePaper Archive™ system. This paper chronicles the planning and design phases of the project, the adoption of the “agile scrum” project management framework, and the migration processes developed to transfer 450,000 pages of historical legacy newspaper content from a commercial system to an open-source system hosted in-house.
