Contents

Editorial

Jan Damoiseaux
The International Consensus on ANA Patterns (ICAP): from conception to implementation — 789
Refers to article on p 830

Review

Hikmet Can Çubukçu, Deniz İlhan Topçu and Sedef Yenice
Machine learning-based clinical decision support using laboratory data — 793

Mini Review

Ben Cowper, Alicia N. Lyle, Hubert W. Vesper, Katleen Van Uytfanghe and Chris Burns
Standardisation and harmonisation of thyroid-stimulating hormone measurements: historical, current, and future perspectives — 824

Opinion Papers

Maria Infantino, Nicola Bizzaro, Wilson de Melo Cruvinel, Edward K.L. Chan and Luis E.C. Andrade
Adopting the International Consensus on ANA Patterns (ICAP) classification for reporting: the experience of Italian clinical laboratories — 830

Anna Carobene, Andrea Padoan, Federico Cabitza, Giuseppe Banfi and Mario Plebani
Rising adoption of artificial intelligence in scientific publishing: evaluating the role, risks, and ethical implications in paper drafting and review process — 835

Biological variation of inflammatory and iron metabolism markers in high-endurance recreational athletes; are these markers useful for athlete monitoring? — 844

General Clinical Chemistry and Laboratory Medicine

Jean-Marc Giannoli, Mathieu Bernard, Julien L’Hirondel, André Heim and Tony Badrick
A model for managing quality control for a network of clinical chemistry instruments measuring the same analyte — 853

Seunghoo Lee, Joonsang Yu, Chan-Ik Cho, Eun-Jung Cho, Tae-Dong Jeong, Sollip Kim, Woochang Lee, Sail Chun and Won-Ki Min
Impact of academia–government collaboration on laboratory medicine standardization in South Korea: analysis of eight years creatinine proficiency testing experience — 861

Raúl Rigo-Bonnin, Virginia Mas-Bosch and Francesca Canalias
Measurement uncertainty estimation of free drug concentrations in clinical laboratories using equilibrium dialysis — 870

Jérôme Vialaret, Margaux Vignon, Christophe Hirtz, Stéphanie Badiou, Gregory Baptista, Laura Fichter, Anne-Marie Dupuy, Aleksandra Maleska Maceski, Martin Fayolle, Mehdi Brousse, Jean-Paul Cristol, Claude Jeandel and Sylvain Lehmann
Use of dried blood spots for monitoring inflammatory and nutritional biomarkers in the elderly — 881

Charlotte Oris, Jean-Baptiste Bouillon-Minois, Samy Kahouadj, Bruno Pereira, Gabriel Dhaiby, Valentim Bailly Defrance, Julie Durif, Jeannot Schmidt, Farès Moustafa, Damien Bouvier and Vincent Sapin
S100B vs. “GFAP and UCH-L1” assays in the management of mTBI patients — 891

Valentin Braun, Uta Ceglarek, Alexander Gaudl, Joanna Gawinecka, Daniel Müller, Manfred Rauh, Matthias Weber and Christoph Seger
Evaluation of five multisteroid LC–MS/MS methods used for routine clinical analysis: comparable performance was obtained for nine analytes — 900
Chung Shun Ho, Kirsten Hoad, Brian R. Cooke, Trisha Andersen, Peter Graham, Sjoerd A.A. van den Berg, Michaela F. Hartmann, Clara W.S. Lo, Tze Ping Loh, Yolanda B. de Rijke, Bertrand D. van Zelst, Stefan A. Wudy, Rosita Zakaria and Ronda F. Greaves

Ensuring quality in 17OHP mass spectrometry measurement: an international study assessing isomeric steroid interference — 911

Nora Vogg, Lydia Kürzinger, Sabine Kendl, Christina Pamporaki, Graeme Eisenhofer, Christian Adolf, Stefanie Hahner, Martin Fassnacht and Max Kurlbaum

A novel LC-MS/MS-based assay for the simultaneous quantification of aldosterone-related steroids in human urine — 919

Christopher W. Farnsworth, Brittany Roemmich, Grant M. Spears, David L. Murray, Angela Dispenzieri and Maria Alice V. Willrich

Clinical specificity of two assays for immunoglobulin kappa and lambda free light chains — 929

Matteo Vidali, Federico Giacchetti, Andrea Sangiorgio, Chiara Vantaggiato, Giulia Rodari, Chiara Orsenigo, Adriana Di Modugno, Filomena Napolitano, Daniela Morniroli, Lorenzo Colombo, Eriselda Profka, Giulia Vizzari, Fabio Mosca, Ferruccio Ceriotti, Giovanna Mantovani, Maura Arosio, Maria L. Giannì and Claudia Giavoli

Estimation of the reference values and decision limits for growth hormone in newborns using dried blood spots — 939

Alenka France Štiglic, Ingrid Falnoga, Alenka Sešek Briški, Marko Žavbi, Joško Osredkar, Milan Skitek and Janja Marc

Reference intervals of 24 trace elements in blood, plasma and erythrocytes for the Slovenian adult population — 946

Hematology and Coagulation

Hanah Kim, Mina Hur, Jong-Ho Yi, Gun-Hyuk Lee, Seungho Lee, Hee-Won Moon and Yeo-Min Yun

Detection of blasts using flags and cell population data rules on Beckman Coulter DxH 900 hematology analyzer in patients with hematologic diseases — 958

Cancer Diagnostics

Luisa Agnello, Salvatore Buscemi, Giuseppe Di Buono, Matteo Vidali, Bruna Lo Sasso, Antonino Agrusa and Marcello Ciaccio

Drainage fluid LDH and neutrophil to lymphocyte ratio as biomarkers for early detecting anastomotic leakage in patients undergoing colorectal surgery — 967

Cardiovascular Diseases

Zhongxin Li, Shuo Yang, Jiao Qiao, Yuan Tan, Qi Liu, Boxin Yang, Weimin Feng and Liyan Cui

Performance evaluation of a novel high-sensitivity cardiac troponin T assay: analytical and clinical perspectives — 979

Diabetes

Yu Liu, Yihan Wang, Xu Wan, Hongtao Huang, Jie Shen, Bin Wu, Lina Zhu, Beirui Wu, Wei Liu, Lin Huang, Kun Qian and Jing Ma

Ferric particle-assisted LDI-MS platform for metabolic fingerprinting of diabetic retinopathy — 988

Infectious Diseases

Chang Liu, Dennis Görlich, Clifford A. Lowell, Joseph E. Italiano, Jan Rossaint, Markus Bender, Alexander Zarbock and Andreas Margraf

Thrombopoietin levels in sepsis and septic shock – a systematic review and meta-analysis — 999

Ebe D’Adamo, Valentina Botondi, Luigi Falconio, Giustina Giardinelli, Patrizia Di Gregorio, Sergio Caputti, Bruna Sinjari, Oriana Trubiani, Tonino Traini, Francesca Gazzolo, Maria Chiara Strozzi, Antonio Maconi and Diego Gazzolo

Effect of temperature on presepsin pre-analytical stability in biological fluids of preterm and term newborns — 1011
