DE GRIJUTER
The highly selective international mathematical journal Computational Methods in Applied Mathematics (CMAM) considers original mathematical contributions to computational methods and numerical analysis with applications mainly related to PDEs. CMAM seeks to be interdisciplinary while retaining the common thread of numerical analysis, it is intended to be readily readable and meant for a wide circle of researchers in applied mathematics.

All information regarding notes for contributors, subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/cmam.
