

CHEMICAL PRODUCT AND PROCESS MODELING

EDITORS-IN-CHIEF

Rahmat Sotudeh-Gharebagh, University of Tehran, Iran
Navid Mostoufi, University of Tehran, Iran
Jamal Chaouki, Ecole Polytechnique de Montreal, Canada

ASSOCIATE EDITORS

Ricardo Aguilar-López, CINVESTAV-IPN, México
Sameer Al-Asheh, Jordan University of Science and
Technology, Jordan
Adel Al-Taweel, Dalhousie University, Canada
Costin Sorin Bildea, University Politehnica of Bucharest,
Romania
Miryan Cassanello, Universidad de Buenos Aires,
Argentina
Alkis Constantinides, Rutgers, State University of New
Jersey, USA
Marc-Olivier Coppens, University College London, UK
Mario R. Eden, Auburn University, USA
Eugénio C. Ferreira, Universidade do Minho, Portugal
Iftikhar Karimi, National University of Singapore,
Singapore
Eugeny Kenig, University of Paderborn, Germany
Jiri Klemes, University of Pannonia, Hungary
Andrzej Kraslawski, University of Lappeenranta, Finland
Surendra Kumar, Indian Institute of Technology Roorkee,
India

Jae W. Lee, The City College of New York, USA
Patrick Linke, Texas A&M University at Qatar, Qatar
Norman W. Loney, New Jersey Institute of Technology,
USA
Davide Manca, Politecnico of Milano, Italy
Mark Nelson, University of Wollongong, Australia
Heinz A. Preisig, Norwegian University of Science and
Technology, Norway
Fernando Preto, CANMET Energy Technology Centre,
Canada
Todd Pugsley, University of Saskatchewan, Canada
Luis Puigjaner, Universitat Politecnica de Catalunya, Spain
Jean-Michel Reneaume, Ecole Nationale Supérieure en
Génie des Technologies Industrielles, ENSGTI, France
Sohrab Rohani, University of Western Ontario, Canada
Panos Seferlis, Aristotle University of Thessaloniki and
Centre for Research and Technology, Greece
Paul Stuart, Ecole Polytechnique de Montreal, Canada
Bill Svrcek, University of Calgary, Canada
Jan Verstraete, IFP Energies nouvelles, France
Johan Warna, Abo Akademi University, Finland
Joachim Werther, Technical University Hamburg, Germany
Brent Young, University of Auckland, New Zealand
Yifang Zhu, UCLA School of Public Health, USA

Chemical Product and Process Modeling (CPPM) is the premier forum for theoretical and applied research on product and process modeling, simulation and optimization. Thanks to its international editorial board, the journal assembles the best papers from around the world on modern modeling, simulation and optimization techniques and it also covers the gap between product and process. The range of topics includes equation-oriented modeling and simulation, sequential and modular simulation, performance of industrial process simulators, computational fluid dynamics, environmental, food, pharmaceutical and fine chemical process modeling. The journal brings together chemical engineering researchers, practitioners, and software developers in a new forum for the international modeling and simulation community. Editors represent top engineering institutions across the globe, such as the University of Tehran, the Ecole Polytechnique de Montreal, Rutgers, Indian Institute of Technology, the Technical University Hamburg, and the University of Buenos Aires.

The publisher, together with the authors and editors, has taken great pains to ensure that all information presented in this work (programs, applications, amounts, dosages, etc.) reflects the standard of knowledge at the time of publication. Despite careful manuscript preparation and proof correction, errors can nevertheless occur. Authors, editors and publisher disclaim all responsibility for any errors or omissions or liability for the results obtained from use of the information, or parts thereof, contained in this work.

The citation of registered names, trade names, trademarks, etc. in this work does not imply, even in the absence of a specific statement, that such names are exempt from laws and regulations protecting trademarks etc. and therefore free for general use.

Contents

Research Articles

Shaikh A. Razzak

Study of Phase Distribution of a Liquid-Solid Circulating Fluidized Bed Reactor Using Abductive Network Modeling Approach — 77

Bhadri Srinivas, Srikanth Karthik, and B. Sankararao
Optimization of Trickle-Bed Reactors (TBRs) for Hydrodesulfurization (HDS) and Hydrodearomatization (HDA) of Diesel using Single and Multiple Objectives — 93

Hosain Darvishi, Gholamhassan Najafi, Adel Hosainpour, Jala Khodaei, and Mohsen Aazdbakht

Far-Infrared Drying Characteristics of Mushroom Slices — 107

D. K. Chibwe, G. Akdogan, and P. Taskinen

Numerical Investigation of Combined Top and Lateral Blowing in a Peirce-Smith Converter — 119
