This issue is dedicated to
PROFESSOR TORNICE KADEISHVILI
on the occasion of his 70th birthday.
Contents

Research Articles

Benoit Fresse
The extended rational homotopy theory of operads —— 493

Marek Golasiński, Paweł Bilski
On the spectralization of affine and perfectly normal spaces —— 513

Marek Golasiński, Thiago de Melo
Generalized Jiang and Gottlieb groups —— 523

Johannes Huebschmann
The formal Kuranishi parameterization via the universal homological perturbation theory solution of the deformation equation —— 529

Hiroshige Kajiura
Cyclicity in homotopy algebras and rational homotopy theory —— 545

Sergey V. Lapin
Cyclic homology of cyclic $\infty$-simplicial modules —— 571

Quinn Minnich, Ronald Umble
An $A_\infty$-coalgebra structure on a closed compact surface —— 593

Francis Sergeraert
The homological hexagonal lemma —— 603

Survey

Jim Stasheff
A twice twisted tale —— 623

Research Article

Mikael Vejdemo-Johansson
Algorithms in $A_\infty$-algebras —— 629
