Original Articles

Lucie Heim, Loïc Brancheriau, Remy Marchal, Nabila Boutahar, Sylvain Lotte, Louis Denaud, Eric Badel, Karima Meghar and Kevin Candelier
Variation analyses of extractive contents by NIR-spectroscopy bring out the differences between agroforestry and forestry walnut (Juglans regia × nigra) trees — 781

Ana Alves and José C. Rodrigues
Correlation between lignin content and syringyl-to-guaiacyl (S/G) ratio of Eucalyptus globulus wood — 791

Takato Nakano
Accelerated relaxation behavior during water desorption in the mechano-sorptive creep of wood: modeling and analysis based on the free volume concept and Kohlrausch–Williams–Watts function — 799

Valentino Cristini, Jan Tippner, Patrik Nop, Jan Zlámal, Mojtaba Hassan Vand and Vít Šeda
Degradation of beech wood by Kretzschmaria deusta: its heterogeneity and influence on dynamic and static bending properties — 813

Tiantian Yang, Shaodi Zhang, Changtong Mei and Erni Ma
Performance improvement of poplar wood based on the synergies of furfurylation and polyethylene glycol impregnation — 825

Kentaro Abe, Tsubasa Yonekawa and Tomoaki Natsume
Artificial lignification of a cellulose microfibril-based hydrogel and resulting effect on tensile properties — 838

Gottfried Aufischer, Raphaela Süß, Birgit Kamm and Christian Paulik
Depolymerisation of kraft lignin to obtain high value-added products: antioxidants and UV absorbers — 845

Peng Liu, Chao Jin, Kai Zhang, Yu Xue, Boxu Gao, Yingshuai Jia, Yueer Yan, Hongbin Zhang, Sinong Wang and Yi Tang
A CP/MAS 13C NMR investigation of cellulose ultrastructure in traditional Chinese handmade papers — 853

María Consuelo Díaz-Maroto, Manuel López-Viñas, Lucía Loarce, María del Álamo Sanza, Ignacio Nevares, María Elena Alañón and María Soledad Pérez-Coello
Quality control of natural cork stoppers by image analysis and oxygen transmission rate — 863
