CONTENTS

S. Abali, S. Kılınç
Effects of sintering temperature on the microstructural properties of Al₂O₃–Y₂O₃ powder mixtures [free access] 430

Synthesis of Al/Cu core–shell particles through optimization of galvanic replacement method in alkaline solution 439

D. V. On, L. D. Vuong, T. V. Chuong, D. A. Quang, V. T. Tung
Study on the synthesis and application of BaTiO₃ nanospheres 448

D. Deng, Z. Chen, Y. Hu, Y. Tong, X. Liang
Preparation and post-treatment of silver powders for front contact pastes of silicon solar cells 457

M. M. Niasar, M. J. Molaei, A. Aghaei
Microwave absorption properties of Zn-doped barium ferrite (BaFe₁₂₋ₓZnxO₁₉) decorated reduced graphene oxide 465

S. Sadeghi, H. Ebrahimifar
The effect of electroplating current density on microstructure, corrosion, and wear behavior of Ni–P–W–TiO₂ coating 474

L. Mamundi Azaath, U. Natarajan
Investigation on the tool worn surface morphology and machining characteristics of the Hardox steel using minimum quantity lubrication 486

M. Fakharpour, J. Hajihoseini
Optimal removal of iron impurities from kaolin by combination of Aspergillus niger & Bacillus subtilis 498

A. Farrahoor, H. Zuhailawati
Review on the mechanical properties and biocompatibility of titanium implant: The role of niobium alloying element 505
