Contents

Original Papers

Yuan Liu, Yan Cui and Wenjun Li
Predicted interfacial thermal conductance and thermal conductivity of graphite flakes/Al composites with different alloy composition — 1015

Amine Charfi, Ruttba Aziz, Mohamed Kharrat, Mohd Farooq Wani, Maher Dammak and Rakesh Sehgal
Tribological behaviour of nano-sized beta phase silicon nitride: effects of the contact conditions — 1025

S. Yuvaraj, K. Venkatesh Raja, M. Bakkiyaraj, R. Malayalamurthi, S. Magibalan, K. Thavasilingam and K. Muralidharan
Experimental assessment on the contact characteristics of 3D printed flexible poly lactic acid (PLA) soft fingertips — 1033

Kumari Pooja, Mridula Tripathi and Priyanka Chawla
Efficient natural dye sensitized solar cell from PVDF based polymer electrolyte filled with layered graphite — 1045

Li Cheng, Shulin Xing, Jizhuang He, Yunfei He, Jiahua Li and Chunlin Fu
Regulation of the photovoltaic performance of TiO$_2$@MAPbI$_3$ core–shell nanowire arrays — 1053

Fatma Tugce Senberber Dumanli and Emek Moroydor Derun
Hydrothermal synthesis of CoAl$_2$O$_4$ spinel: effect of reaction conditions on the characteristic and morphological features — 1062

Zhenling Yang, Guofeng Ma and Jun Zhang
Peroxymonosulfate oxidation process activated with heterogeneous amorphous Co$_{78}$Si$_8$B$_{14}$ alloy for degradation of Orange II — 1070

Piyush Kuchhal and Narsingh Dass
A study of melting temperatures in bismuth and antimony — 1078

Short Communication

Hosane A. Taroco, Siclele L. A. Gonçalves, Eric M. Garcia, Cristiane G. Taroco, Julio O. F. Melo and Amauri G. Souza
Corrosion study of 430 stainless steel with cobalt electrodeposited obtained from the recycling of Li-ion batteries — 1083

News

DGM – Deutsche Gesellschaft für Materialkunde — 1090
