The Journal of Business Valuation and Economic Loss Analysis (JBVELA) is the premier peer-reviewed academic journal in the increasingly important fields of business valuation, economic loss analysis, and risk. How to calculate the value of a business, quantify economic loss, and assess and manage risk are questions essential to many areas of business, law, and operations, such as accounting and finance, estate law, mergers and acquisitions, litigation support, insurance and risk management, and forensic economics. Scholars of economics, finance, management, insurance, risk management, and law will find valuable real-world examples to complement their research, while accountants, attorneys, risk managers, and financial analysts will find in-depth conceptual studies that inform their day-to-day work.
