JOURNAL OF INVERSE AND ILL-POSED PROBLEMS aims to present original articles on the theory, numerics and applications of inverse and ill-posed problems. These inverse and ill-posed problems arise in mathematical physics and mathematical analysis, geophysics, acoustics, electrodynamics, tomography, medicine, ecology, financial mathematics etc. Articles on the construction and justification of new numerical algorithms of inverse problem solutions are also published.

ISSN 0928-0219 · e-ISSN 1569-3945 · CODEN JIIPA4

All information regarding notes for contributors, subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/jiip.

FSC Paper from responsible sources FSC® C107500
Tieyu Liu, Jing Li, Dandan Cheng, Chenghao Wang  
Multi-scale ground penetrating radar full waveform inversion with hybrid Tikhonov and total-variation regularization for different geometric structure —— 587

Alexander Shlapunov, Yulia Shefer  
On the uniqueness theorems for transmission problems related to models of elasticity, diffusion and electrocardiography —— 603

Samat A. Kassabek, Targyn A. Nauryz, Amankeldy Toleukhanov  
Analytical solution of Stefan-type problems —— 627

Jianwen Huang, Xinling Liu, Jingyao Hou, Jianjun Wang, Feng Zhang, Jinping Jia  
High-order block RIP for nonconvex block-sparse compressed sensing —— 647

Fuchang Huo, Kai Zhang, Yu Gao, Jingzhi Li  
Adaptive neural network surrogate model for solving the nonlinear elastic inverse problem via Bayesian inference —— 669

Min Zhong, Xinyan Li, Xiaoman Liu  
Extract the information via multiple repeated observations under randomly distributed noise —— 683

Alexander E. Chernyavsky, Leonid L. Frumin, Andrey A. Gelash  
Right and left inverse scattering problems formulations for the Zakharov–Shabat system —— 701

Jianli Xiang, Guozheng Yan  
Modified linear sampling method for inverse scattering by a partially coated dielectric —— 713

Cristian Vega, Cesare Molinari, Lorenzo Rosasco, Silvia Villa  
Fast iterative regularization by reusing data —— 733

Kai Cao, Daniel Lesnic  
Determination of the time-dependent effective ion collision frequency from an integral observation —— 761

Huihui Wang, Guixian Xu, Qingping Zhou  
A comparative study of variational autoencoders, normalizing flows, and score-based diffusion models for electrical impedance tomography —— 795

Pallavi Mahale, Farheen M. Shaikh  
Simplified REGINN-IT method in Banach spaces for nonlinear ill-posed operator equations —— 815

James W. Webber  
Generalized Abel equations and applications to translation invariant Radon transforms —— 835

Rong Zhang, Feiping Xie, Xingjun Luo  
A discretizing Tikhonov regularization method via modified parameter choice rules —— 859
