Contents

Dogan Akgul, Safak Metin Kirkar, Busra Selenay Onal, Ali Celen, Ahmet Selim Dalkilic and Somchai Wongwises
Single-phase flow heat transfer characteristics in helically coiled tube heat exchangers —— 1

Suxia Hou and Jijun Luo
Design and optimization of an integrated gamma ray scanning system for the uranium sample —— 26

Bing Ren, Shiyin Xu, Fujun Gan and Ping Yang
Numerical simulation of the effect of rod bowing on critical heat flux —— 38

Hesham F. Elbakhshawangy, Abdelfatah Abdelmaksoud and Osama S. Abd El-Kawi
Flow and heat transfer characteristics of a nanofluid as the coolant in a typical MTR core —— 48

Hala Kamal Girgis Selim
Mathematical modeling of point kinetic equations with temperature feedback for reactivity transient analysis in MTR —— 59

Mohamad Zarei
An enhanced formalism for the inverse reactor kinetics problem —— 66

Wen-Sheng Hsu, Shao-Shuan Chen, Jong-Rong Wang, Jung-Hua Yang, Shao-Wen Chen and Chunkuan Shih
The establishment of analysis methodology of NRCDose3 for Kuosheng nuclear power plant decommissioning —— 72

Yahya A. Al-Zahrani, Khurram Mehboob, Tariq F. Alshahrani, Fouad A. Abolaban and Hannan Younis
Analysis of SMART reactor core with uranium mononitride for prolonged fuel cycle using OpenMC —— 82

Hossein Zayermohammadi Rishehri and Majid Zaidabadi Nejad
Conceptual design of an innovative I&XC fuel assembly for a SMR based on neutronic/thermal-hydraulic calculations at the BOC —— 91

Riham M. Refeat and Rania A. Fahmy
Optimized fractional-order PID controller based on nonlinear point kinetic model for VVER-1000 reactor —— 104

Oğuzhan Öztürk, Şeyma Nur Karaburç, Murat Saydan and Ülkü Sultan Keskin
High rate X-ray radiation shielding ability of cement-based composites incorporating strontium sulfate (SrSO₄) minerals —— 115

Said Haggag
Vibration analysis for predictive maintenance and improved reliability of rotating machines in ETRR-2 research reactor —— 125

Calendar of events —— 135
