Contents

Material Properties
Abdul Aziz Shaikh, Preetam Datta, Prithwish Dastidar, Arkadip Majumder, Maharghya Dyuti Das, Pratikrit Manna and Subhasis Roy
Biopolymer-based nanocomposites for application in biomedicine: a review — 83

Preparation and Assembly
Yan Zhou, Xiangdong Liu, Dekun Sheng and Yuming Yang
CsxWO3-doped PEG/sweet potato form-stable composites for light-thermal conversion and energy storage — 117

Zhiyong Wu, Chuang Ma, Qinghe Niu, Caiwu Wu and Ye Wang
Preparation, characterization, and application of fluorinated acrylate copolymer for the conservation of stone building heritages in Putuo Zongcheng Temple, China — 125

Engineering and Processing
Yong Lu and Chen Wang
Study on the influence of in-mold sequential injection molding process parameters on mechanical properties of self-reinforced single composites — 135

Mohammad Reza Samadi, Mohammad Hossein Alaei and Jafar Eskandari Jam
Numerical investigation of the strength of Al/GFRP adhesive bonding under tensile loading — 145
