FOREWORD

Papers published in Reviews in Analytical Chemistry are of two main types. One is the classical review of the literature covering a certain period in the development of a particular field. This review is addressed to the expert in the field and brings him up to date in a concise manner. The other kind of review is written for the research worker contemplating entering a new field of endeavor or for the chemist who wishes to examine the applicability of a new technique to his research. The second type of review is more descriptive and basic.

Potential contributors who wish to send manuscripts for consideration should write to the Editor:

REVIEW OF SPECTROPHOTOMETRIC METHODS
FOR DETERMINATION OF VANADIUM

Behrooz Rezaie, Raziya Zabeen, A.K. Goswami and
D.N. Purohit

Department of Chemistry
M.L. Sukhadia University
Udaipur - 313 001, Rajasthan, India

This is Part V of the series of reviews on
spectrophotometric determination of various metals by
Professor D.N. Purohit and coworkers.
Part I, Nickel, was published in Vol. IX, No. 4, 1989.
