Contents

Haruo Kanno, Damien D. Pearse, Hiroshi Ozawa, Eiji Itoi and Mary Bartlett Bunge
Schwann cell transplantation for spinal cord injury repair: its significant therapeutic potential and prospectus — 121

Wen-Lin Chen, Ying-Ying Niu, Wei-Zheng Jiang, Hui-Lan Tang, Chong Zhang, Qi-Ming Xia and Xiao-Qing Tang
Neuroprotective effects of hydrogen sulfide and the underlying signaling pathways — 129

Alla B. Salmina, Yulia K. Komleva, Olga L. Lopatina, Natalia V. Kuvacheva, Yana V. Gorina, Yulia A. Panina, Yulia A. Uspenskaya, Marina M. Petrova, Irina V. Demko, Anna S. Zamay and Natalia A. Malinovskaya
Astroglial control of neuroinflammation: TLR3-mediated dsRNA-sensing pathways are in the focus — 143

Dibbanti Harikrishnareddy, Shubham Misra, Sujata Upadhyay, Manish Modi and Bikash Medhi
Roots to start research in amyotrophic lateral sclerosis: molecular pathways and novel therapeutics for future — 161

Bas-Jan Zandt, Bennie ten Haken, Michel J.A.M. van Putten and Markus A. Dahlem
How does spreading depression spread? Physiology and modeling — 183

Mehdi Ghasemi and Arash Hadipour-Niktarash
Pathologic role of neuronal nicotinic acetylcholine receptors in epileptic disorders: implication for pharmacological interventions — 199

Jing Gan, Yi Qu, Jiao Li, Fengyan Zhao and Dezhi Mu
An evaluation of the links between microRNA, autophagy, and epilepsy — 225

Cem Ismail Küçükali, Murat Kürtüncü, Halil İbrahim Akçay, Erdem Tüzün and Ali Emre Öge
Peripheral nerve hyperexcitability syndromes — 239
