Contents

Marion Vincent, Olivier Rossel, Mitsuhiro Hayashibe, Guillaume Herbet, Hugues Duffau, David Guiraud and François Bonnetblanc
The difference between electrical microstimulation and direct electrical stimulation – towards new opportunities for innovative functional brain mapping — 231

Lite Ge, Kai Liu, Zhonghua Liu and Ming Lu
Co-transplantation of autologous OM-MSCs and OM-OECs: a novel approach for spinal cord injury — 259

Mrinmay Chakrabarti, Arabinda Das, Supriti Samantaray, Joshua A. Smith, Naren L. Banik, Azizul Haque and Swapan K. Ray
Molecular mechanisms of estrogen for neuroprotection in spinal cord injury and traumatic brain injury — 271

Yongjun Sun, You Chen, Liying Zhan, Linan Zhang, Jie Hu and Zibin Gao
The role of non-receptor protein tyrosine kinases in the excitotoxicity induced by the overactivation of NMDA receptors — 283

Noémi Császár, Felix Scholkmann, Vahid Salari, Henrik Szőke and István Bókkon
Phosphene perception is due to the ultra-weak photon emission produced in various parts of the visual system: glutamate in the focus — 291

Anjana Bali and Amteshwar Singh Jaggi
Angiotensin II-triggered kinase signaling cascade in the central nervous system — 301

Abubakar Tijjani Salihu, Sangu Muthuraju, Zamzuri Idris, Abdul Rahman Izaini Ghani and Jafri Malin Abdullah
Functional outcome after intracerebral haemorrhage – a review of the potential role of antiapoptotic agents — 317

Shammy Chandel, Sunil Kumar Gupta and Bikash Medhi
Epileptogenesis following experimentally induced traumatic brain injury – a systematic review — 329
