DE GRUYTER

RANDOM OPERATORS AND STOCHASTIC EQUATIONS is a quarterly journal publishing peerreviewed, English-language, original and translated articles on the theory of random operators and stochastic analysis.

The majority of the articles is written by authors from the former USSR, but contributions from leading experts from all over the world will be published as well. Although the focus is on theoretical aspects, contributions on physical and technical applications are included in the journal.

All information regarding notes for contributors, subscriptions, Open access, back volumes and orders is available online at www.degruyter.com/rose.
