Contents

Atomic, Molecular & Chemical Physics

Hang Liu, Cui-Yan Xu, Xiao-Dan Jing, Yan Qiao and Li-Qiang Feng
Chirp waveform control to produce broad harmonic plateau and single attosecond pulse —— 747

Dynamical Systems & Nonlinear Phenomena

Ahmed Atteya, Mohamed A. El-Borie, Gamal D. Roston, Abdel-Aziz Samir El-Helbawy, Punam Kumari Prasad and Asit Saha
Ion-acoustic stable oscillations, solitary, periodic and shock waves in a quantum magnetized electron–positron–ion plasma —— 757

Xiao Li, Wentao Jiang, Xiaochao Chen and Zhihong Zhou
Nonlinear forced vibration of rotating composite laminated cylindrical shells under hygrothermal environment —— 769

Baichuan Lin, Bo Chen, Yinghui Li and Jie Yang
Vibration characteristics and stable region of a parabolic FGM thin-walled beam with axial and spinning motion —— 787

Hydrodynamics

Muhammad Naveed, Muhammad Imran and Zaheer Abbas
Curvilinear flow of micropolar fluid with Cattaneo–Christov heat flux model due to oscillation of curved stretchable sheet —— 799

Quantum Theory

Henrik Schlüter, Florian Gayk, Heinz-Jürgen Schmidt, Andreas Honecker and Jürgen Schnack
Accuracy of the typicality approach using Chebyshev polynomials —— 823

Solid State Physics & Materials Science

Mutaz Salih, M. Khairy, Babiker Abdulkhair, M. G. Ghoniem, Nagwa Ibrahim, M. A. Ben Aissa and A. Modwi
Impact of Sn ions on structural and electrical description of TiO₂ nanoparticles —— 835

Fatma B. M. Ahmed, Ali Badawi and Fouad Abdel-Wahab
The effect of non-bridging oxygen on the electrical transport of some lead borate glasses containing cobalt —— 847

Thermodynamics & Statistical Physics

G. Nath
Analytical solution for unsteady adiabatic and isothermal flows behind the shock wave in a rotational axisymmetric mixture of perfect gas and small solid particles —— 853
