Contents

Dynamical Systems & Nonlinear Phenomena

Syeda Neelam Naeem, Anisa Qamar, Ata-ur Rahman and Wedad Albalawi

The effect of dust streaming on arbitrary amplitude solitary waves in superthermal polarized space dusty plasma — 1081

Jitendra, Vikas Chaurasiya, Kabindra Nath Rai and Jitendra Singh

Numerical simulation of a non-classical moving boundary problem with control function and generalized latent heat as a function of moving interface — 1091

Solid State Physics & Materials Science

Walid Filali, Mohamed Boubaya, Elyes Garoudja, Fouaz Lekoui, Ibrahime Abdellaoui, Rachid Amrani, Slimane Oussalah and Nouredine Sengouga

Artificial intelligence approach to analyze SIMS profiles of $^{11}\text{B}$, $^{31}\text{P}$ and $^{75}\text{As}$ in n- and p-type silicon substrates: experimental investigation — 1143

Fulvio Melia

Why does momentum depend on inertia? — 1117

Gravitation & Cosmology

Nambu Jona-Lasinio model of relativistic superconductivity — 1107

Hydrodynamics

Abdur Rasheed, Asif Nazir, Areeb Fatima, Bilal Ramzan, Zubia Kiran and Muhammad Jamil

Kelvin–Helmholtz instability in magnetically quantized dense plasmas — 1123

Quantum Theory

Nahla Bourouis, Kamel Khounfais and Meheiddine Bouatrous

Relativistic $\hat{S}$-matrix formulation in one dimension for particles of spin-s ($s = 0, 1/2$) — 1131
