Review

Oliver Janka, Oliver Niehaus, Rainer Pöttgen and Bernard Chevalier
Cerium intermetallics with TiNiSi-type structure —— 737

Naglaa F. El-Sayed, Ewies F. Ewies, Marwa El-Hussieny, Leila S. Boulos and EISayed M. Shalaby
Synthesis of novel pyrazole derivatives using organophosphorus, stibine, and arsine reagents and their antitumor activities —— 765

Shahrzad Abdolmohammadi, Reza Ghiasi and Sam Ahmadzadeh-Vatani
A highly efficient CuI nanoparticles-catalyzed synthesis of tetrahydrochromenediones and dihydropyranoc[cr]
chromenediones under grinding —— 777

Qiong Wu, Xisong Miao, Hai Wang, Yongmei Wu, Jun Li, Jing Lu, Qingyan Zhou and Hongping Ju
Supramolecular architecture based on high-lacunary sandwich-type building blocks: synthesis, characterization, and properties —— 783

Jürgen Voss, Kerstin Polchow-Stein and Gunadi Adiwidjaja
Preparation and conformation of 3,4-anhydro-1,2-O-isopropylidene-5-O-mesy1-β-D-tagatopyranose and methyl 4-chloro-4-deoxy-1,3,5-tri-O-mesy1-β-D-fructopyranoside —— 789

Jing Su, Lian Duan and Wenjun Zheng
Chromium(III) complexes with 1,2,4-diazaphospholide and 2,6-bis[N-1,2,4-diazaphosphol-1-yl]pyridine ligands: synthesis, X-ray structural characterization, EPR spectroscopy analysis, and magnetic susceptibility studies —— 795

Mohamed E. Azab, Eman M. Flefel, Nermien M. Sabry and Abd El-Galil E. Amr
Synthesis and antimicrobial activity of some linear dipeptide pyridine and macrocyclic pentaazapyridine candidates —— 803

Quirin J. Axthammer, Thomas M. Klapötke and Burkhard Krumm
Studies on the synthesis and properties of 1,1,1-trinitroprop-2-yl urea, carbamate and nitrocarbamate —— 811

Martin Davi, Tim Schultze, Denise Kleinschmidt, Frank Schiefer, Birgit Hahn and Adam Slabon
Gold nanocrystal arrays as electrocatalysts for the oxidation of methanol and ethanol —— 821

Olaf Reckeweg, Armin Schulz, Christof Schneck, Falk Lissner and Thomas Schleid
Syntheses, single-crystal structures, vibrational spectra and DSC/TG analyses of orthorhombic and trigonal Ag[N(CN)] —— 827
