COVER ILLUSTRATION FRONT COVER: ^{14}N magic-angle spinning (MAS) NMR spectra of diamagnetic LaTiO_2N perovskite oxynitride and its paramagnetic counterpart CeTiO_2N are presented by Zili Ma, Can Lu, Jianhong Chen, Anna Rokicińska, Piotr Kuśtrowski, Robert Coridan, Richard Dronskowski, Adam Slabon, and Aleksander Jaworski (pp. 275–280, this issue). This constitutes the first high-resolution ^{14}N MAS NMR spectrum collected from a paramagnetic solid material. Quite remarkably, no paramagnetic ^{14}N NMR shift is observed for CeTiO_2N with respect to LaTiO_2N and other diamagnetic oxynitride perovskites.
