Acknowledgements

The Editor wishes to acknowledge the continued support of the White Mountain Research Station in developing this natural history handbook and to offer special thanks to Donna Young, Vicki Doyle-Jones, Leticia Sanchez, and Barbara Widawski for their patience and diligence during the coordination, compilation, and writing of the natural history guide over a period of several years.

The Editor and authors thank Tracey Storer, Robert Usinger, and the University of California Press for the reproduction of some figures in *Sierra Nevada Natural History*. This now-classic handbook served as a model for our volume on the natural history of the White-Inyo Range. The authors of the chapter on insects would like to thank Gordon Marsh of the Museum of Systematic Biology, University of California, Irvine, for the identification of insects and general advice; Nathan Rank for arranging and photographing the butterfly illustrations; and J. Donahue and the County Museum of Los Angeles for the loan of butterfly specimens for making photographic plates. The authors of the chapter on mammals acknowledge James Patton of the Museum of Vertebrate Zoology of the University of California, Berkeley, for his comments on the draft of the chapter, and David M. Lee for his illustrations of the mammals.

Partial financial support for the field work related to the chapters on amphibians and reptiles was provided by the Environmental Field Program, University of California at Santa Cruz, and the Wilhelm Martens Fund of the Museum of Vertebrate Zoology, University of California, Berkeley. Ben Ashworth of Independence and Richard Moss of Cinnamon Ranch, Hammil Valley, kindly allowed the authors to conduct field work on their ranches. Randy Benthin, Charles Brown, Chip Emerson, Jeremy Liu, Jay Martin, Sean Nakamura, Nancy Staub, David B. Wake, Tom Wake, and Darrell Wong assisted the authors. Derham Giuliani of Big Pine, Phil Pister of the California Department of Fish and Game in Bishop, and Lee Silvernale of Independence provided valuable information on the distribution of some of the species of amphibians and reptiles. Margaret Fusari, Harry Greene, Anne Macey, Robert I Macey, Kenneth Norris, Robert J. Trentmann, and David B. Wake provided valuable comments on the chapter.
