ILLUSTRATIONS

FIGURES

1. Nested (but often overlapping) scales of social and spatial units 20
2. Line graph and table of number of sites by period, by region, in central Greece 44
3. Comparative sizes of Mycenaean palaces 72
4. Some lesser-known tholoi of central Greece 87
5. LH IIIC pottery with seafaring, siege, and feasting scenes 130
6. Toumba building and cemetery at Lefkandi 163
7. Examples of Geometric pottery with early writing and figural scenes 221

MAPS

1. General maps of the Mediterranean and mainland Greece 3
2. The distribution of Mycenaean material culture and limits of the study area 4
3. Archaeological surveys and sites included in this study 34
4. Topography and sites of Boeotia and East Lokris 46
5. Topography and sites of Phokis and Malis 48
6. Topography and sites of Thessaly 51
7. Topography and sites of Euboea and the Sporades 53
8. Topography and sites of Attica and the Saronic Gulf 55
9. Early Mycenaean and Palatial Bronze Age sites 68
10. Palatial Bronze Age sites and networks 69
11. Comparative territories for Mycenaean palaces using Thiessen polygons and cost-based allocation methods 74
12. Network of sites mentioned in the Linear B tablets from Thebes and the modeled extent of Theban territory 77
13. Imports to Greece of LH IIIB date and sites and kingdoms of the Late Bronze Age eastern Mediterranean and Near East 104
14. Postpalatial Bronze Age site locations compared to the Palatial Bronze Age 122
15. Postpalatial Bronze Age sites and networks 123
16. Lefkandi pottery network and settlement pattern in LH IIIC 139
17. Combined map of Mediterranean sites mentioned in the text and imports to LH IIIC contexts in the Aegean 143
18. Prehistoric Iron Age site locations compared to the Postpalatial Bronze Age 154
19. Prehistoric Iron Age sites and networks 155
20. Location of early iron finds in Greece 173
21. Map of iron ore sources in central Euboea 175
22. Clay source at Phylla and map of sites with NAA analysis 178
23. Combined map of sites mentioned in the text with evidence for long-distance interaction and PG-MG imports in the Aegean 182
24. Protohistoric Iron Age site locations compared to the Prehistoric Iron Age 196
25. Protohistoric Iron Age sites and networks 197
26. Parallel maps of site catchments in the Prehistoric Iron Age and Protohistoric Iron Age 198
27. The landscape and topography of central Euboea 209
28. Euboean colonies, showing affiliations with Chalkis or Eretria, based on historical sources 211
29. Early Greek inscriptions in the Mediterranean, showing location and quantity 219
30. Combined map of sites mentioned in the text with evidence for long-distance interaction 226
31. Appendix map 1: sites in the western part of the study area with locations marked by number 264
32. Appendix map 2: sites in the eastern part of the study area with locations marked by number 265

All maps created by the author. The maps in this book were created using ArcGIS® software by Esri. Basemaps are derived from Esri’s Terrain: Multi-Directional Hillshade layer (Source: Airbus, USGS, NGA, NASA, CGIAR, NLS, OS, NMA, Geodatastyrelsen, GSA, GSI and the GIS User Community). TABLES

1. Chronology and abbreviations for the Aegean in the Late Bronze Age (LBA) and Early Iron Age (EIA) 7
2. Term searches for chronological periods in the Nestor bibliographic database 13
3. Archaeological surveys and gazetteers for the study area 35
4. Types of sites by period 38
5. Numbers and types of sites recorded by Murray (2017) for mainland Greece and Crete 39
6. Numbers of sites and communities per period, with settlement hierarchy 40
7. Connections with Thebes based on Linear B documents 76
8. Appendix table: all sites in the study area, showing name, region, site number, type of remains present, and periods of occupation 266
