Introduction: The What, When, and How of Life's Beginnings	I
<i>J. William Schopf</i>	
1. Historical Understanding of Life's Beginnings	7
<i>John Oró</i>	
What Is Life?	7
Beliefs and Hypotheses on the Origin of Life	12
Chemical Evolution	15
Personal Reminiscences	20
Cosmological Evolution and the Origin of Life	25
The Earth-Moon System	29
Exploration of the Solar System	35
Life beyond the Solar System	37
Epilogue	39
References	41
2. From Big Bang to Primordial Planet: Setting the Stage for the Origin of Life	46
<i>Alan W. Schwartz and Sherwood Chang</i>	
Introduction	46
Origin of the Biogenic Elements	48
Origin of the Solar System	50
Earth	64
Further Reading	75
3. Formation of the Building Blocks of Life	78
<i>Stanley L. Miller and Antonio Lazcano</i>	
Introduction	78
The Heterotrophic Origin of Life	81
Prebiotic Synthesis of Amino Acids	84
Prebiotic Synthesis of Nucleic Acid Bases	92
Prebiotic Synthesis of Sugars	98

Hydrothermal Vents and the Origin of Life	100
Extraterrestrial Organic Compounds and Prebiotic Evolution	103
An Autotrophic Origin of Life?	105
Have Too Many Cooks Spoiled the Soup?	107
References	109
4. From Building Blocks to the Polymers of Life	113
<i>James P. Ferris</i>	
The Biopolymers in the First Life	113
The RNA World: The Prebiotic Synthesis of RNA	120
The Role of Polypeptides in the Origin of Life	126
Conclusions	135
References	137
Further Reading	139
5. The Origin of Biological Information	140
<i>Leslie E. Orgel</i>	
Introduction	140
The RNA World	142
What's Wrong with the Molecular Biologist's Dream?	150
The Metabolist Argument	154
Conclusion and Outlook	154
References	155
6. When Did Life Begin?	158
<i>J. William Schopf</i>	
Introduction	158
Evidence from Living Organisms	159
Evidence from the Rock Record	166
When Was Earth Ready for Life?	174
The <i>What</i> and <i>When</i> of Life's Beginnings	178
Further Reading	178
List of Contributors	181
Glossary	185
Index	205
