

ACKNOWLEDGMENTS

BRIAN W. COAD AND JAMES D. REIST

A work of this nature depends heavily on the contributions of many people over a long period of time. Scientists, naturalists, and consultants sent specimens of fishes from Arctic waters to the Canadian Museum of Nature (CMN) for identification and for deposit in the collections. Reprints of scientific papers, books, and consultant reports were also freely given. These materials were built up over 130 years, most actively during the past 60 years, and form one of the main bases of this work. Many were based upon field expeditions to the Canadian Arctic during this time frame (see the “History” section in the introduction), often under rigorous conditions. It is not possible to list all the contributors here, but we hope that *Marine Fishes of Arctic Canada* is a worthy acknowledgment of their efforts.

The writing phase of this book received help from a number of people and institutions that need to be thanked specifically. The main external funding agencies were the Nunavut Wildlife Management Board (Jim Noble and Dan Pike, both now retired), and the Inuvialuit Fisheries Joint Management Committee (Bob Bell, now retired), which are gratefully acknowledged here. Brian Coad, Claude Renaud, and Noel Alfonso were supported by the CMN; James Reist, Chantelle D. Sawatzky, J. Brian Dempson, and Les N. Harris by Fisheries and Oceans Canada (DFO), Winnipeg; Karen Dunmall, University of Manitoba and DFO; Michael Power, University of Waterloo, Ontario; and Heidi K. Swanson, University of Alberta, Edmonton; H. Powles and Andries Blouw (both now retired), who aided in early development and funding of the book by DFO; Peter Møller by the Zoological Museum, University of Copenhagen; and Fikret Berkes by the University of Manitoba, Winnipeg. These institutions contributed salary and overhead to the project for extended periods.

The maintenance, correction, and large amounts of input to the database on fish distributions, as well as the production of maps, were carried out by Noel R. Alfonso, CMN. Teams that input mapping data and located copies of scientific articles comprised principally Naomi Keyzer-de Ville, Diane Pathy, Melanie Gaudet, Stuart Lithwick, and Nadia Arbach at the CMN; and Neil J. Mochnacz and Megan Puchniak at the Arctic Fish Ecology and Assessment Research Section, DFO, Winnipeg.

Mark Graham is thanked for access to his slide collection and particularly for his support as Director of the Research Services Division and later as Vice-President of Research and Collections, CMN, during the long course of this project, latterly assisted by Wendy McPeake.

Staff at University of Toronto Press helped bring this book to fruition: executive editor Suzanne Rancourt, managing editor Leah Connor, copy editor Angela Wingfield, and production manager Ani Deyirmenjian. Thanks also to Peter Ross and Linda Gustafson at Counterpunch for their work on the design of this book.

Artists and illustrators are listed in “Illustration Credits,” and also include Shannon MacPhee, Julie Henry, Sheila Atchison, Chantelle Sawatzky, and Michell Kamula, all DFO, for introductory chapters. Illustrations in the section “Arctic Fish, Northern Cultures, and Traditional Ecological Knowledge” in the introduction were obtained through the efforts of Erin Gurski and Mélissa Duncan, Canadian Museum of History, Gatineau.

We should also like to thank the following for their contributions, which varied from small, but crucial, items to large and expansive datasets.

The Canadian Museum of Nature: Mike Wayne and Anne-Marie Barter at the library for assistance in libraries and for access to documents on native foods; Sylvie Laframboise for collections assistance and patient verification of records; Alison Murray (formerly of CMN) for checking collections held by the Redpath Museum, Montréal; Roger Bull for identification of a shark specimen through bar-coding; A. Thérien for stitching assistance; and Mélanie Gaudet-Leblanc and Daniel Nadon (formerly of CMN) for technical support.

Fisheries and Oceans Canada: Andries Blouw (now retired) for early aid in developing administrative linkages to support the publication; Brian Dempson for information on indigenous fish names; Chantelle Sawatzky, Darcy McNicholl, Margaret Treble, and Sheila Atchison for mapping, literature, database aid, and collation of photographs; Margaret Treble, Kevin Hedges, Tim Siferd, Andy Majewski, Shannon MacPhee, and Sheila Atchison for provision of occurrence data, specimens (such as *Apristurus*, *Platytrectes apus*, and *Rouleina maderensis* from Siferd), and related fieldwork

in support; Claude Nozères for providing access and permission to use specimen photographs; David Orr, Newfoundland, for information on cruise data; Roberta Miller and Luci Bossé, Institut Maurice-Lamontagne, Mont-Joli, for distributional records; Doug Swain, Moncton, for information on the post-moratorium total allowable catch set for Atlantic Cod; and the staff of the DFO libraries. Chantelle Sawatzky spent considerable time and effort in the final stages of the manuscript, tying up loose ends, and thus contributed significantly to the overall outcome.

P. Bartsch and C. Lamour, Museum für Naturkunde, Humboldt-Universität zu Berlin, for access to specimens; Barbara Brown and Scott Schaefer, American Museum of Natural History, New York, for distributional records; Dylan Radcliffe for his invaluable contribution to GIS programming that greatly facilitated map production; Patrick Campbell, Oliver Crimmen, and James MacLaine, Natural History Museum, London, for access to collections and distributional records; Sylvie Coad for assistance in libraries and for access to documents on native foods; Robert G. Fechhelm, LGL Ecological Research Associates Inc., Bryan, Texas, for maps of anadromous fish distributions; Jon Fong, California Academy of Sciences, San Francisco, for distributional records; Nora R. Foster, University of Alaska, Fairbanks, for checking holdings of Arctic fishes; John Gilhen, Nova Scotia Museum of Natural History, Halifax, for distributional records; Lou van Guelpen, Huntsman Marine Laboratory, St Andrews, New Brunswick, for access to records and specimens; Jack Hall, Ottawa, for photographing certain species to aid in illustrations; Dave Hardie and Jeff Hutchings, Dalhousie University, Halifax, for information on Arctic lake populations of Atlantic Cod; Stephen Hendrie, Communications Officer, Maki-vik Corporation, Kuujuaq, for copies of publications; Erling Holm and Mary Burrige, Royal Ontario Museum, Toronto, for help in untangling collection localities and for distributional records and loans of materials; Haakon Hop, Norwegian Polar Institute, Tromsø, for assistance in contacting Peter Leopold for use of the Arctic Cod photograph; Christiane Hudon, Environment Canada, Montréal, for copies of papers and extensive databases that saved us much work; Tomio Iwamoto, California Academy of Sciences,

San Francisco, for constructive comments on the macrourid key; Steen Knudsen for the *Careproctus kidoi* drawing; Sven Kullander, Swedish Museum of Natural History, Stockholm, for data on marine fish distributions from Tundra Northwest 99; Jasmine Lee, Ottawa, for bibliographic assistance; Harald Loeng, Institute of Marine Research, Bergen, for information on Russian work in the Arctic; J. Andrés López, University of Alaska Museum, for Beaufort Sea records; Catherine W. Mecklenburg, Point Stephens Research, Auke Bay, Alaska, for information exchanges on Arctic fishes, their systematics, and their distribution; W. Brian McKillop, Manitoba Museum, for distributional records; Suzanne Monette, formerly University of Ottawa, for providing technical support; J. Neilson, MacLaren Atlantic Limited, Dartmouth, Nova Scotia, for results of fisheries surveys; Jørgen Nielsen, Zoological Museum, University of Copenhagen, for access to collections; Ted Pietsch, University of Washington, Seattle, for confirming identification of *Chaenophryne longiceps* and for explaining the trivial name *gladisfenae*; Geoff Power, University of Waterloo, Ontario, for copies of articles; Wayne E. Roberts, University of Alberta Museum of Zoology, Edmonton, for distributional records; staff of the libraries of the Geological Survey of Canada (Ottawa), Environment Canada, and the Department of Indian Affairs and Northern Development (Gatineau); Duane Stevenson, National Oceanic and Atmospheric Administration (NOAA), for information on the taxonomy of Manefishes; Eric Taylor and Megan McCusker, University of British Columbia, Vancouver, for access to distributional records; Peter Troffe, Royal British Columbia Museum, Victoria, for checking holdings of Arctic fishes; Richard Verdon, Hydro-Québec, Montréal, for a database on collections from James Bay; Ken Vogt (deceased), University of Alaska, Anchorage, for information on the exploitation of Arctic Lamprey; Jim Whittome, University of Alberta, Edmonton, for fish distribution records; and Bruce Wing, Auke Bay Laboratory, Alaska, for checking holdings of Arctic fishes.

We also thank the two scientific reviewers for their diligence in examining the entire manuscript, noting corrections needed, providing useful comments, and pointing out inconsistencies.
